ANNUAL REPORT OF THE COMMISSIONER OF INDIAN AFFAIRS.

DEPARTMENT OF THE INTERIOR,
OFFICE COMMISSIONER OF INDIAN AFFAIRS,
Washington, September 12, 1912.

SIR: I have the honor to hand you the Eighty-first Annual Report of the Office of Indian Affairs.

A DECADE OF INDIAN AFFAIRS.

In 1902, 77,000 letters were received by the Indian Office, which to conduct its correspondence had 132 employees; in 1911, 209,000 letters were received and there were 227 employees; in other words, the volume of correspondence had increased almost threefold, whereas the number of employees had not increased twofold. Even these figures do not nearly represent the added responsibilities of the office, for in the last 10 years Indian Office affairs have taken on a magnitude, a breadth, and a detail which are significant of a real attempt to master the Indian problem by preparing the Indians to leave their status of wardship, at last to lose their anomalous character as a people set apart and to join their white neighbors in the body of American citizenship.

For the recent development of the Government's policy, legislation in the early years of the decade of the eighties, tardily extending to Indians protection of the criminal law, and in the late eighties, giving general authority in the Dawes Act for allotting tribal lands in severalty, prepared the way. But for 15 years after the general allotment act was passed its benefits fell far short of its promise, for the essential purpose of the statute was perverted, since under the act of February 28, 1891 (26 Stats., 794), Indians who had received allotments were able to take the line of least resistance by leasing their lands to white farmers and by continuing to live quite after their former fashion. Thus it happens that present policies are comparatively of recent development—the policies which center upon individual Indians and individual Indian families, seeking to give each Indian the health and the knowledge of health which will enable him to associate and to compete with his fellow Americans, to place each Indian upon a piece of land of his own where he can by his own efforts support himself and his family, or to give him an equivalent opportunity in industry or trade, and to lead him to conserve and utilize his property as means to these ends rather than to have it as

an unappreciated heritage, through the loss of which only moral and industrial debasement and eventually pauperism are to be derived.

Long before the United States inaugurated its plan for the reclamation of arid lands the Indian service had spent considerable sums for irrigation; but before 1906 appropriations of Congress for this purpose aggregated only $1,356,000 and the work was inharmoniously and wastefully conducted through Indian agents and superintendents, with occasional assistance from a trained engineer. In 1902, however, a chief engineer was appointed and irrigation for Indians began to assume definiteness and plan. In 1905 the appropriation was $390,000; in 1911 it had grown to $1,400,000. Since 1907 appropriations have totaled $6,220,000, of which $4,830,000 were made reimbursable to the United States by the Indians when the Indians have become self-supporting upon their lands. Of the appropriations made before 1906, only $75,000 were made reimbursable. In all, 230,000 acres of land have been placed under ditch and are either being irrigated or can be irrigated immediately upon the construction of inexpensive laterals. During the season for greatest activity there are now employed in this service 150 engineers, assistants, and field men, such as rodmen, chainmen, and the like. Of this force 27 employees are organized for technical and administrative activities and 36 for operating and maintaining existing projects. Since 1906 all the more important projects except the systems at Crow Reservation, Mont., and Yakima Reservation, Wash., have been begun.

The timber interests of Indians on allotted and on tribal lands reach a present value of $84,000,000. Before 1906 there was no widespread protection against forest fires, nor were there plans for broad development and utilization of forest resources; operations were confined almost exclusively to Wisconsin and Minnesota, where timber was cut by contractors, in 1906 realizing $247,000. Indian agents and superintendents were in charge of the work, having technical assistance only from a superintendent of logging. Forest resources outside of Wisconsin and Minnesota were given little attention, although the timber on Indian reservations in Arizona is valued at $11,000,000, in Washington at $13,000,000, and in Oregon at $27,000,000.

A realization of the importance of Indians' property in forests led in 1908 to a cooperative agreement whereby the Forest Service undertook to manage and administer Indian forests. About 15 months later the agreement was terminated for the reason that divided responsibility in administration and in results did not prove satisfactory. At once the Indian Office set about creating an administration organization which would comprehensively administer Indians' property in timber throughout the country. There are now 144 men engaged with forestry affairs in positions from forester

to forest guards. In 1911 sales of timber brought in for Indians $2,192,000.

Petroleum is a natural resource belonging to the Indians which has been developed almost entirely since 1902. In 1902 the Census Bureau, in a special report upon the production of petroleum, dismissed Indian Territory, occupied by the Five Civilized Tribes, with a minute footnote recording the existence of 13 wells; concerning Oklahoma, the report said there were many natural petroleum seeps, but nothing in the way of actual petroleum production. In that year, however, wells within the present boundaries of Oklahoma produced 37,000 barrels of oil. On July 31, 1902, the Secretary of the Interior made the first oil and gas lease of Indian lands within this area. Under the Curtis Act of 1898 the Secretary had received authority over these lands which had previously been exercised, if at all, by the Five Civilized Tribes themselves. From 1903 the development of oil was phenomenal. To date over 22,000 leases have been made of lands restricted in alienation. Under these leases 133,245,000 barrels of oil have been produced and $6,344,000 in royalties have been paid to the Indians. Furthermore, since 1908 royalties paid upon oil and gas leases on lands of the Osage Indians have aggregated $1,900,000. From inconsequential beginnings 10 years ago Oklahoma has now come to rank second among oil-producing States, in 1911 yielding almost one-fifth of all petroleum produced in the United States.

For allotment of lands in severalty outside the boundaries of Indian Territory Congress has appropriated $4,900,000, of which it appropriated almost $2,000,000 since 1906. Of the 104,000 Indians who have been given allotments through these appropriations almost one-fourth, 24,408, have received their allotments within the past five years. The present efficiency of the organization used in making allotments appears not only in the gross amount of work it has accomplished, but also in its economies; for instance, in 1910 new arrangements for surveying were made with the General Land Office under which much delay is avoided, and the average cost per allotment has been reduced from $42 to $28. At the same time new methods of keeping records of allotments in the Indian Office were introduced, avoiding both the cost and the chance of error incident to copying elaborate schedules, and giving within one cover the original schedule, the original plats, and the original classification of surplus lands. Economies in making allotments are particularly desirable, since the appropriations are reimbursable from funds of the Indians.

Allotment of the Five Civilized Tribes under the act of 1898, conducted by the Commission to the Five Civilized Tribes and later by the Commissioner to the Five Civilized Tribes, was the largest task

of its kind ever undertaken, resulting in allotment of lands in severalty to upward of 90,000 persons. Through a succession of events these individualized holdings in land and the individual affairs of the allottees have come under the Union Agency of the Indian Office. Even after extensive removals of restrictions on alienation and the like, administration of affairs of members of the Five Civilized Tribes whose lands are still restricted from alienation reaches great proportions.

Almost necessarily allotment proceeded by rule of thumb; furthermore, designation of lands in severalty was not accompanied on any broad scale with equipment in training or in improvements and implements. As a consequence, in many parts of the country Indians were land poor, often possessing fertile lands but having no means to utilize them. To furnish individual Indians with an opportunity to secure inclination and training and a provision of working capital has been the great task of the past 10 years. A vast deal remains to be done, but something has been accomplished.

Legislation was necessary as a basis for progress in this direction. An act of 1902 permitted the Indians to sell allotments which they had inherited; an act of 1906 gave the Secretary of the Interior authority to issue patents in fee to allottees of whose competency to manage their own affairs he was satisfied; and an act of 1910 in addition to strengthening the earlier statutes enabled allottees to devise their lands. Somewhat similar legislation has affected allottees in the Five Civilized Tribes.

Under the legislation affecting allottees outside the Five Civilized Tribes there have been sold 874,446 acres of inherited land for $13,411,000, and 215,186 acres of land held by incompetent Indians for $3,394,000; 6,167 patents in fee have been issued for a total of 638,870 acres. Thus, out of an allotted area of 17,000,000 acres 1,728,000 acres have been alienated or made alienable through this office and the department. Furthermore, in the Five Civilized Tribes, where 15,700,000 acres were allotted, 8,000,000 acres were made alienable by the act of May 27, 1908. In districts where Indian lands are desirable, the results of allotment accompanied by policies of leasing and of sale are illustrated by the situation at Winnebago, Nebr.: Forty-eight per cent of the allotted lands are under lease, 13 per cent are being farmed by Indians, and 39 per cent have been sold.

As has been indicated, the purpose of the legislation permitting sales and authorizing the issue of patents in fee was to enable Indians to change holdings in land which they would not need as land into another form of property which they could utilize to improve and cultivate land which they kept, or which they could have as capital in occupations other than farming. These purposes were not attained in any reasonable degree when the first sales of inherited

lands were made, for the reason that the proceeds were placed directly in the hands of the Indian heirs, usually persons who for the first time had in their possession considerable sums of money. As was to be expected, they very shortly were precisely in the economic condition they had occupied before their lands were sold, and if anything were worse off through the debauchery which attended the loss of their money. To remedy this situation of affairs the Secretary in 1904 required as a condition precedent to his approval of petitions for sale an agreement that the proceeds should be administered for the benefit of the Indians, with a stipulation that each Indian creditor might receive a monthly allowance of $10 in cash. To this supervision persons who find advantage in dealing with Indians made much objection, and have never ceased their antagonism. The principle adopted by the Secretary has, however, been maintained, although the incidental provision for a monthly allowance, which most Indians used as an excuse for a miserable life of indolence, was abrogated in 1909, and all disbursements of these funds were made questions of the condition and necessities of the individual Indians.

In the first two years of the operation of the act permitting the sale of inherited lands the proceeds of sales amounted to $3,450,000. Then provision was made for supervision of these funds, but superintendents made deposits in Government depositories without security other than the security extended to individual depositors. Since 1905 depositories of these funds have been required to give bond for the protection of the full amount of these deposits. In 1911 deposits of individual Indians' money in banks earned $272,948 in interest for the Indians.

Together with other moneys accruing to individual Indians rather than tribes, such as rentals for allotments, proceeds of timber sold from allotments, and royalties from oil and gas produced on allotments, these funds are designated as individual Indian moneys. Notwithstanding the fact that a large area of allotments has been patented in fee simple and thus proceeds from their sale and lease go directly to individual owners, the amount of individual Indian moneys on deposit in banks has steadily increased; but the deposits have increased in the face of increased liberality of disbursement where Indians have sources from which their funds can be replenished, and it is not necessary to husband scanty deposits of old and disabled Indians that they may be kept from want. On July 1, 1908, $3,992,300 had accumulated; during the following 12 months $8,991,300 were received; during the year $6,468,000 were disbursed. On July 1, 1909, there was a balance on hand of $6,622,600; receipts during the following year were $10,584,600; $7,656,900 were disbursed. On July 1, 1910, there was a balance on hand of $9,550,400; during the year $7,881,800 were received; disbursements were

$6,696,500. On July 1, 1911, $10,735,700 were on hand. Thus, in 1910 receipts increased by over 16 per cent; disbursements, however, increased by over 18 per cent. In 1911 receipts decreased by 26 per cent, but disbursements decreased by only 12 per cent. Furthermore, an analysis of disbursements indicates the policies under which these funds have been administered; the amount annually placed directly in the hands of Indians, as means of developing responsibility, has remained rather constant at about $2,300,000; but the amounts checked out of depositories by Indians, with the approval of the Indian Office, for use in beneficial ways, were $2,103,600 in 1909, $2,543,500 in 1910, and $4,339,200 in 1911; in other words, in 1910 there was an increase of 20 per cent over 1909, and in 1911 an increase of 70 per cent over 1910. If one remembers that these funds represent the only ready assets of many of the Indians—the only financial means they have of improving their condition—and that the owners are as yet either, in fact, incompetent for complete control of their property or have of their own accord remained in the class of incompetents by failing to apply for patents in fee or certificates of competency, it is difficult to avoid a conclusion that much greater liberality has been used in managing this part of the Indians' estate than would be permitted to a guardian of white citizens who were in similar circumstances.

Of the $20,821,400 individual Indian moneys disbursed between July 1, 1908, and June 30, 1911, the Indians have undoubtedly expended a part in unwise ways, but they have also used considerable sums to purchase good grades of work horses, implements, and equipment, and to erect modern houses and barns. For example, during the last four months of the fiscal year 1911 members of the Five Civilized Tribes in Oklahoma erected 88 houses and 22 barns, using almost entirely their individual Indian moneys.

In the administration of Indian affairs no reform more intimately affecting the welfare of Indians has been made than the change in the administration of individual Indian money enforced, after abundant notice to the public, under the Secretary's order of December 17, 1909; this order provided that thereafter no assistance should be given to creditors in collecting from Indian debtors. Before the time of this order, in the face of a regulation promulgated as early as 1880 Indian traders and other creditors had in effect presented their bills to the superintendents in charge of reservations.

In order that there might be no chance for a complaint against the Government, based on past practices, provision was made not only that thereafter all persons extending credit to Indians should do so entirely at their own risk, but also that all debts contracted by Indians before December 17, 1909, and unpaid, should be scheduled, scrutinized, and made stated accounts, so far as they were found just.

Accordingly, there have been scheduled in the Indian Office on behalf of 2,586 creditors claims aggregating $1,706,000. So far lack of clerical assistance has prevented the office from proceeding further than making the schedules. So soon as Congress responds to the request for further clerical assistance, the claims will be reduced to stated accounts. The necessity for investigating the claims now scheduled before they are reduced to stated accounts is apparent from experiences the office has had in the past; in 1906, upon investigation of traders' claims at Winnebago, Nebr., aggregating $30,000, it was ascertained that not more than 50 per cent of the amounts claimed represented consideration received by the Indians.

Training of Indian children and of Indian adults for lives of self-sufficiency and of usefulness—for inclination and for knowledge how to make their individual possessions in lands and in money beneficial to them—has since 1902 steadily increased in effectiveness.

In 1901 the appropriation for schools for the first time exceeded $3,000,000, in 1908 reaching a maximum of $4,105,715, and amounting to $3,757,000 in 1912; in the 12 years, 1901–1912, inclusive, the appropriation for Indian schools aggregated $44,200,000.

In 1901 the average attendance at Indian schools was 24,077; in 1908 it reached 25,964, and in 1911 it had fallen to 23,647. These figures become significant when considered in connection with the statistics for attendance of Indian children in public schools; for in 1902 the average attendance at public schools was 98; in 1911 it was 10,625.[1] From these data is follows that thousands of Indian children, who 10 years ago would have attended Government schools, now have such standards of personal cleanliness and come from such homes that they attend public school in company with their white neighbors; and it also follows that the average attendance for Government schools in 1911 contained a proportionately larger number of Indian children whose exclusion as yet from public schools, either because their homes are at a distance or because of personal habits, is the only justification for the maintenance of separate Government schools. In the last two years the devotion of Government schools to their proper province has been further secured by the elimination of many children who in reality are ineligible for education at Government expense.

The attendance of Indian children at schools of all kinds—Government, mission, and public—has increased from 24,120 in 1902 to 39,397 in 1911. The fact that in 1911, 24,000 Indian children of school age were not in any school indicates at once the educational task which remains and the extent in which the task was not met in 1902.

[1] It should be said, however, that the figures for 1902 refer only to Indian children in public schools under Government contract; those for 1911 give the attendance in public schools throughout the country.

Not only have Indian schools been made to reach more effectively the Indian children who stand in most need of them, but during this 10-year period there have been incessant efforts to make more effective the training given each Indian child to the end that in the most direct way Indian schools may coordinate with the vital policy of making Indians normal members in the citizenship of their communities. All possible insistence has been put upon industrial training; in academic subjects Indian schools have adopted the courses of study of their States that they may correlate with local public schools; to the same end emphasis has been placed upon the development of local day and boarding schools rather than upon distant nonreservation schools; and in 1910 the Indian schools were grouped into six districts, each under a supervisor, who has the duty of visiting and keeping in constant touch with the schools in his jurisdiction, that each school may be kept at its highest efficiency and its greatest usefulness to the Indians it is meant to serve.

The process of eliminating Indian schools in localities where they are no longer needed for their peculiar purposes appears in acts of Congress under which, in 1911, the governor of Utah accepted for his State the grant of the Ouray School, and the governor of Colorado for his State accepted grants of the Fort Lewis and Grand Junction Schools.

Earnest efforts have been made, too, in industrial education of adult Indians. In cooperation with the Department of Agriculture an important farm for the development of new crops for the Southwest has been maintained at Sacaton, Ariz., since 1908, and successful cooperative experiments have been tried elsewhere. Furthermore, several demonstration farms have been maintained by employees in the Indian Service as examples for neighboring Indians. In 1910 examinations were held by the Civil Service Commission for expert farmers, men qualified both in modern technical training and in practical experience. At the end of 1911 48 such men had been added to the service and were at work among Indian farmers. At the end of 1911 superintendents in charge of reservations reported that out of a group of 28,544 able-bodied male adult Indians, 24,489 were farming for themselves, and out of a group of 65,636 able-bodied adults, 20,178 were engaged in stock raising as their principal means of support.

In 1907, however, it was realized that education and industrial incentive did not affect the modes of life of the more backward Indians with sufficient rapidity to protect them from diseases which arise from insanitary surroundings. For years physicians had been employed, drugs furnished, and some local hospitals maintained, but there was a lack of appreciation of the great need of preventive medical measures directed by experts. After an investigation, which

disclosed prevalence of tuberculosis and of trachoma, appeals were made to Congress, which for 1910 made a special appropriation of $12,000, for 1911 a special appropriation of $40,000, for 1912 a special appropriation of $60,000, and for 1913 a special appropriation of $90,000. These special appropriations enabled the office to establish five sanatoria; to send ophthalmologists to centers of trachoma prevalence to supervise and direct the staff of resident medical employees which in 1911 had grown to 100 physicians employed in established positions, 60 contract physicians, 54 nurses, and 88 field matrons; and finally to conduct a campaign for education of Indians, both young and old, in the elements of sanitation and of healthful habits. In 1905 the whole cost of the medical service of this office—salaries of physicians and the like and cost of medical supplies—as paid from appropriations available, was $120,000; in 1909 it was $166,000; in 1911 it was about $260,000. This increase in six years of more than 110 per cent in expenditures on behalf of the Indians' physical well-being has been accompanied by an even greater effectiveness of expenditures. Ten years ago there was not only indifference to questions of health but payments of salaries to physicians were unaccompanied by provision of such equipment that the physician could travel the great extent of territory to which he was assigned and among as many as 5,000 Indians perform with his own hands the whole gamut of major and minor operations and treat every ailment known to medicine. In a measure the increased expenditure of recent years represents the cost of transmuting into direct efficiency the potential usefulness of positions which already existed.

Intoxicants are almost as great a menace to Indians as disease. Recognizing the great harmfulness of intoxicating liquors for Indians, Congress has for more than 100 years maintained a fixed and unchanging policy of absolute prohibition upon traffic with Indians in intoxicating liquors. The act of March 30, 1802 (2 Stat. L., 246), conferred on the President authority to prevent or restrain introduction or distribution of spirituous liquors among Indian tribes; in 1815 Congress prohibited stills in Indian country; and in 1832 Congress provided "no ardent spirits shall be hereafter introduced, under any pretense, into the Indian country." Until 1906, however, enforcement of these statutes and subsequent enactments was left to Indian agents and superintendents and their Indian police, assisted so far as might be by local peace officers and by representatives of the Department of Justice. In 1906 criminal dockets in Indian Territory became so crowded and the possibility of early trial so remote that disregard of the statutes forbidding introduction of intoxicants assumed large importance. To meet the emergency Congress, in the act of June 21, 1906, appropriated $25,000 to be used to suppress the traffic in intoxicating liquors among Indians, and in August, 1906,

a special officer was commissioned and sent to Oklahoma, that he and his subordinates might, through detective operations, supplement the efforts of superintendents in charge of reservations. In the fiscal year 1909, when the appropriation had grown to $40,000, this service began to operate throughout all States where Indians needed protection. In 1911 the service had grown until it had an appropriation of $70,000 and an organization including 1 chief special officer, 1 assistant chief, 2 constables, 12 special officers, and 143 local deputies stationed in 21 States. The increasing success of the service appears in the fact that in 1909 561 cases which the service secured came to issue in court, resulting in 548 convictions, whereas in 1911 1,202 cases came to issue, 1,168 defendants were convicted, and but 34 defendants were acquitted by juries. In 1911 fines imposed amounted to $80,463, or more than the appropriation for the service.

The activities which I have outlined as incident to the attack at every point upon the "Indian problem" would have been impossible without changes in business methods within the Indian Office itself. In 1907 and 1908 the office was completely reorganized, the most modern methods of filing were installed, new systems of bookkeeping were instituted, and in every part of the routine economies were enforced. As a result the heavy and intricate correspondence of the office, in spite of its increase by threefold within 10 years, is handled with a directness and a dispatch which were unknown before. Simplication of office methods has enabled clerks to devote less time to mere routine and a great deal more time to the significance of the subjects with which they deal. Accordingly the employees of the office are not only more efficient, but as a body they show genuine interest in the part they have in considering problems of administration. From reorganization the intangible but none the less perceptible gains quite equal the statistical increase in the amount of work each clerk performs.

PRESENT DEFECTS.

The burden of any statement of Indian affairs during the last 10 years is individualization. As yet, however, individualization has progressed rapidly only in tenure of lands. As tribes Indians have in the Treasury of the United States $41,800,000, interest on which in the sum of $1,900,000 accrued in 1911. Part of this interest was distributed in per capita payments to members of the tribes—a system of petty doles which is the most considerable surviving portion of the policies of 30 and 40 years ago, and those policies helplessly and frankly contemplated dependence and pauperism. In 1911 per capita payments amounted to a total of $3,700,000; of this sum $333,000 was distributed in shares which were less than $12.

The act of 1907 took the first step applicable generally to all tribes having common funds, giving the Secretary of the Interior discretion, after a member of the tribe applied for his share and was found capable to manage his own affairs, to apportion to him his individual share, which thereupon becomes subject to the Indian's order; the act also gave authority to pay the pro rata shares of disabled Indians. Under this act $1,296,000 of the principal of trust funds have been paid to June 30, 1912.

It will be noticed that there is now no authority of law for segregation of shares of Indians who belong neither to the class of competent Indians nor to the class of disabled Indians. There is a defect in the present statutory authority in that it does not permit the pro rata share of each Indian of every degree of competency to be placed to his individual credit, to be paid to him or husbanded according to his individual development and his individual necessities, and at his death permitted to pass to his next of kin according to the laws of his State. At present a bill submitted by the department intended to confer authority for such disbursement of tribal funds is pending in the Congress, having been reported favorably to the House of Representatives. Of all legislation on behalf of Indians proposed in recent years the enactment of such a statute would mean most for the industrial development of Indians and for their economic independence.

Preliminary to segregation of trust funds the remaining annuities and similar provisions which survive from old treaties should be commuted and capitalized. As a further preliminary all Indian tribes that have claims against the United States should receive legislative authority, under a general statute, to have their claims adjudicated by the Court of Claims. In this way claims of Indians can once for all be adjudicated, those which are just ascertained and prepared for consideration of the Congress, and an element of discontent among Indians and of expectation which may often be unfounded will be permanently removed.

If such legislative authority as I have mentioned is given, tribal affairs will become of small consequence, Indian administration will no longer concern a race but will affect only individuals, and the legislative scheme under which the United States may prepare for withdrawing from its position in Indian affairs will be fairly complete. The statutes are so numerous, however, that there is great need of careful codification, accompanied by some amendment. As the public land laws permit citizens under certain conditions to select second homesteads, Indians who have never received allotments and Indians who have parted with their allotments should be allowed to enter homesteads on agricultural lands within national forests; the statute permitting the devise of allotments should be broadened to allow devise and bequest of all forms of trust property, personal as

well as real, and its benefits should be extended to Indians in Oklahoma outside of the Five Civilized Tribes and the Osage Nation, which already have adequate power to dispose of trust property by will; authority should be granted to permit, under regulations, mining upon Indian reservations set aside by Executive order; and there should be a modern definition of Indian country, or the idea expressed in the term should have a restatement which will accord with present conditions. Some laws affecting particular reservations require amendment, as the provision under which the Flathead Indians would have to reimburse the United States for the whole cost of a $5,000,000 reclamation project, whereas white citizens would receive fully one-half of the benefit; and the exception of timber in the States of Wisconsin and Minnesota from the authority to sell mature living and dead-and-down timber should be annulled.

Any codification of statutes affecting Indians should be annotated to the decisions of the courts and supplemented with a digest of the multitudinous decisions of both State and Federal courts.

In a codification of Federal statutes affecting Indians care should be exercised against the danger of extending present Federal law, for the body of law affecting Indians as a class should be kept within as small compass as possible, and should relate only to subjects about which the necessity of special legislation is imperative. With all the expedition compatible with the Indians' welfare they should be made subject to the laws of their States and be taught to look to their local government instead of the National Government. Because of my conviction that no possible obstacle should be placed in the way of the transformation of Indian affairs administered by the United States into the affairs of normal citizens under the ordinary jurisdiction of the States, I do not suggest that further authority be given for enlarged Federal jurisdiction over minor offenses on reservations, although under existing law it is frequently very difficult to define the power of the office or of its representatives. Important questions of marriage and divorce illustrate difficult points, of which the only proper solution appears to be education of Indians, whether or not they are citizens, to comply with the laws of their States.

Administratively the most serious difficulty which confronts the Indian Office lies in the lack of supervisors or examiners who can go from reservation to reservation and inquire into the superintendents' management of the Indians' business which is in their hands; measured as business, the affairs in the hands of superintendents involve many millions of dollars. For schools the office has a corps of supervisors who in two years have greatly increased the efficiency of educational activities and expenditures; but it is neither possible nor desirable that these men, necessarily men who are essentially "school men," should also attempt to scrutinize adequately the business rela-

tions of superintendents with the Indians in their jurisdictions and the success of superintendents and their employees in assisting Indians toward a wise use of their allotments and money in industrial development. Repeated experiences have demonstrated that superintendents can practice irregularities which a distant office force can not detect, and can so color reports of industrial conditions that the office is for a time misled. Both experience and the dictates of sound administration require frequent examination of agency affairs by a representative of the office who is not personally interested in the management of the agency or in the affairs of the surrounding community. The Commissioner of Indian Affairs and the assistant commissioners annually spend in the field such time as the exigencies of public business and of congressional demands permit, but they can not make detailed examinations at upward of 60 agencies.

If agency affairs are placed under a responsible supervision, administrative economies can at once be installed; for example, leases of allotments for agricultural purposes can be made directly by the superintendent, instead of through the office and the department; thus a vast deal of routine labor would be saved on the reservations and in Washington. If superintendents' actions were subject to frequent examination on the ground, superintendents could be required to make most of the allotments, displacing the special allotting agents and enabling the office each year to save considerable sums of money. Furthermore, it would be possible to examine closely into the necessity and value of the positions now maintained at agencies. There can be little doubt that very considerable economy and greatly increased efficiency could be secured by reducing the number of positions in the field and paying increased salaries in return for more valuable services in the remaining places; but no reduction is possible without great and possibly irreparable harm unless the situation at each agency is considered very critically. Examiners making accurate reports to the office could also furnish such concrete data that it might be possible to obtain from Congress appropriations for repair of buildings which would make some adequate provision against depreciation. Depreciation now progresses from year to year, to the ultimate cost of the United States. And, finally, under competent supervision the business of agencies could be so systematized that effort now spent in unprofitable routine could be turned to such needed activities as the determination of heirs entitled to the estates of deceased Indians. No better example could be set for Indians than through clear-cut and prompt action upon each piece of business they bring to the attention of the superintendent in charge.

In the purchase of supplies this office annually spends over $3,000,000. A large part of the purchases are made through five

warehouses. The needs of the service, however, require no more than two, or at the most three, warehouses.

Partly because of inadequate supervision of superintendents and their relations with Indian allottees and through lack of timely information in Washington, water rights essential for the use of allotted lands on several of the reservations are in jeopardy, although extensive works for irrigation have been constructed. There is danger that while the United States keeps in trust the legal title to allotments, title to water, without which the land is of small value, will have been alienated under State laws based upon beneficial use.

Several administrative changes are necessary that there may be unity of responsibility. For example, the head of the Irrigation Service is a direct subordinate of the Secretary, whereas his staff are subordinate to the Commissioner of Indian Affairs. In the management of affairs in the Five Civilized Tribes there is a somewhat similar condition. The Commissioner to the Five Civilized Tribes, who has in his hands tribal concerns, reports directly to the Secretary; the officer in charge of individual interests for the same Indians reports to the Commissioner of Indian Affairs. The necessity of separate administration of tribal and individual affairs has passed; the duplication incident to the present arrangement, with its heavy expenditure for salaries and office expenses, should come to an end.

And, finally, the force of clerks in the Indian Office should be increased. The present staff labors under a burden of business which at times is almost intolerable. Clerks drawing salaries of $1,600 and $1,800 a year can not get sufficient stenographic assistants; the work of reducing traders' claims to stated accounts can not go forward; the task of determining heirs entitled to the estates of deceased Indians, and in this way preparing for the sale of inherited lands, can not progress in any satisfactory way; and even the examination of disbursing officers' accounts and the posting of expenditures under a thousand or more heads, as required by the form of appropriation, falls into arrears.

The energy put into the administration of Indian affairs for 10 years has had results, but there has to be still more tightening of the tension. Educational opportunities must be taken to thousands of Indian children who are not yet in school; industrial impulse and opportunity must be given to Indians who do not now value their possessions or who have no way to turn their properties to beneficial account; zealous and effective protection of Indians in their property and personal rights has to be secured; medical attention and instruction in the laws of health must be given broadcast throughout the Indian country; a chance has to be extended to thousands of

Indian families for living in sanitary homes. Only in these ways can the day of the Indians' emancipation from national guardianship and of economic, social, and political independence be sped, and the obligation that is upon us of affording the Indians the same opportunities, rights, and privileges as other Americans be discharged.

HEALTH.

The campaign for good health and physical efficiency among the Indians has continued with increased momentum along the lines outlined in my annual report of last year.

With the small force and inadequate funds at our disposal we have endeavored to meet exigencies as they arose; have attempted to stem the tide of disease, and in addition have been gathering such data as would enable us to impress the Congress with the need of money enough to make a complete medical survey of the whole field, and to increase and organize a medical corps for a house-to-house campaign against disease throughout the service.

On the basis of the data so far obtained the President sent a special message to Congress strongly urging this action. The President's message and the estimates submitted are as follows:

To the Senate and House of Representatives:

The present conditions of health on Indian reservations and in Indian schools are, broadly speaking, very unsatisfactory. In many parts of the Indian country infant mortality, tuberculosis, and disastrous diseases generally prevail to an extent exceeded only in some of the most insanitary of our white rural districts and in the worst slums of our large cities.

The death rate in the Indian country is 35 per thousand, as compared with 15 per thousand—the average death rate for the United States as a whole. The average death rate in some of the healthiest of our cities is as low as 12 per thousand. No exact figures are yet available for infant mortality among Indians, but field studies now being made show that while proportionately more Indian babies than white babies are born, very many more Indian babies die.

Last year, of over 42,000 Indians examined for disease, over 16 per cent of them had trachoma, a contagious disease of the eye, frequently resulting in blindness, and so easily spread that it threatens both the Indian communities and all their white neighbors. It is a disease so serious that at no port of entry in this country is the immigrant with trachoma allowed to land. On the Kiowa, Comanche, and Apache Reservations 71 per cent of the school children have trachoma. The curing of this disease frequently requires years of constant care. Of the 40,000 Indians examined, 6,800 had tuberculosis. On the White Earth Reservation, in Minnesota, a house-to-house canvass in 1910 and 1911 revealed that of 3,300 Indians 600 had tuberculosis. An examination of half the Indians on the Blackfeet Reservation, Mont., shows that one-third of that number have tuberculosis. Of the total population of the Colorado River Reservation, Ariz., 20 per cent have tuberculosis. At the school of the Mescalero Reservation, in New Mexico, where climatic conditions are ideal, 5 per cent of the children in school have tuberculosis. Of the 7,000 Indians of the Pine Ridge Reservation, S. Dak., over one-fourth have tuberculosis. Even in

southern California at least 10 per cent of the Indians have this dread disease. In addition to these scourges and the special lowering of vitality which exists in these sections where the Indians can procure intoxicants, they are more subject than the average white man to the whole list of acute diseases. Few Indian homes anywhere have proper sanitary conditions, and in many instances the bad condition of their domestic surroundings is almost beyond belief.

As guardians of the welfare of the Indians, it is our immediate duty to give to the race a fair chance for an unmaimed birth, healthy childhood, and a physically efficient maturity.

The most vigorous campaign ever waged against diseases among the Indians is now under way. It began in 1909. Prior to that time little attention had been given to the hygiene and health of the Indians. On some reservations, equal in area to a State, there were not more than two physicians, frequently only one. In 1909 tens of thousands of Indians were substantially without any chance to reach a doctor. The Government was startled into a reform in this matter through the discovery that at the Phoenix Indian School, Arizona, more than 65 per cent of the children were infected with trachoma. In response to the showing then made, Congress immediately appropriated an emergency sum of $12,000. Physicians sparsely scattered over the Indian country were then organized as the nucleus of an efficient fighting force, and the fight has been conducted not only on curative but on preventive lines. As the need for this work has become more apparent, congressional appropriations have steadily increased; but even to-day the effective fighting force of the service is so disproportionate to the ground to be covered and the problems to be met that it is impossible to make even a medical survey of the whole field.

The Indian service has under its general supervision 296,000 Indians, and of these it is a conservative estimate to say that 160,000 are still entirely dependent on the Federal medical service. This service has 160 physicians, over a third of whom, under their terms of employment, devote only a part of their time to Indians. When it is remembered that Indians are so scattered that a physician frequently has to drive a day or more out and a day or more back to reach one family, the inadequacy of such service is plain. While there are many efficient and self-sacrificing physicians in the service, the smallness of the salaries, which average only $1,186 a year, necessarily affects the qualification and ability of the physicians engaged. In spite of adverse conditions, thousands of cases of tuberculosis and trachoma are being systematically treated, and serious epidemics of diphtheria, measles, cerebrospinal meningitis, and other infectious diseases have been checked. Hundreds of lives have been saved, and a distinct start has been made in getting fresh air and generally better sanitary conditions into the homes.

The Indian medical service should therefore be substantially increased in size and should be lifted into efficiency through the better men whom, as a rule, only better salaries can command. Of course this change should take place along carefully planned business lines and without extravagance and after a comparative study of other medical services—National, State, and local.

Through the proper channels is now submitted to Congress an estimate for the Indian medical service for $253,350, accompanied by a detailed statement of the expenditures required. This sum, together with an addition to the amounts which will probably be available in the Indian appropriation bill for the current year, and which were asked for in that bill before all the data now available were at hand, will enable the Indian service to make a complete medical and sanitary survey of the whole field, with a view to curing existing troubles and to the prevention, so far as may be, of their recurrence. With this additional

appropriation, if granted by Congress, it is believed that the tide can be turned, that the danger of infection among the Indians themselves and to the several millions of white persons now living as neighbors to them can be greatly reduced, and genuine cooperation with local State boards of health now already under way can be adequately provided for. It is not expected to build up a highly organized Indian medical service, but rather to put efficient physicians and nurses and field matrons, properly equipped to reach all the Indian families, in the field, where service under the best conditions is one of constant self-sacrifice and hardship, but where constant application to those methods which the study of modern hygiene has developed will show results so encouraging as fully to justify the expenditure of the sums herein asked.

WM. H. TAFT.

THE WHITE HOUSE, *August 10, 1912.*

The estimates submitted were as follows:

For the construction of a tuberculosis hospital for the treatment of adult tuberculosis cases, and cases past the incipient stage of the disease, for the use of Indian patients from all sections of the country, $100,000; for the employment of two additional medical inspectors, including salary and expenses, $8,400; for the employment and expenses of an assistant supervisor for the developing to greater efficiency the teaching of home sanitation by field matrons and teachers of housekeeping, $4,200; for increasing the number of and salaries of physicians, $85,000; for increasing the salaries of nurses, $2,750; for increasing the salaries of certain field matrons, $4,000: *Provided*, That the amounts paid to physicians, nurses, and matrons out of the funds hereby appropriated shall not be included within the limitation on salaries and compensation of employees contained in the act of June 7, 1897.

To establish a central pathological laboratory, $1,000; for the purchase of transportation equipment for physicians, field matrons, and field nurses, $10,000; for the correction of sanitary defects in Indian homes, $10,000; for the building of screened sleeping porches on schools and hospitals, $10,000; for equipping schools with playground apparatus, $15,000; for the purchase of standard medical literature for physicians, $2,000; for the purchase or publication of pamphlets, postcards, placards, and other literature on health subjects for distribution among Indians, $1,000; in all (submitted), $253,350.

NOTE.—To defray the expenses of a special health campaign planned for the fiscal year 1913 Congress was asked for an appropriation of $250,000. At the present date the Senate has allowed $150,000 only, and if the work is to be carried out as planned additional funds must be appropriated.

If the bill for $150,000, mentioned above, is enacted, the money will be used to defray expenses of the field campaign against the two diseases, trachoma and tuberculosis, and would not be available for use in increasing the efficiency of the work on the reservations where it is proposed to inaugurate separate campaigns for the betterment of the local sanitary conditions.

Of 42,645 Indians examined for disease 16.11 per cent, or 6,870, were found to be suffering from tuberculosis. There is no sanatorium in the United States for the treatment of adult tubercular Indians and there is provision for only 175 incipient tubercular children of school age. The necessity for a Government sanatorium for the accommodation of some of the more needy cases is certainly apparent.

At present the entire Indian country is receiving only such medical inspection as may be made by the medical supervisor and a physician expert who is en-

gaged in special tuberculosis work. Systematic inspection is absolutely necessary, and can not be carried out unless additional inspectors are appointed. These physicians would be assigned to regular districts, where they would have immediate charge of medical matters, including supervision of physicians, collection of vital statistics, and improvement of sanitary conditions on the reservations.

At neither agencies nor schools do physicians have either time or necessary apparatus to carry on pathological work for diagnostic purposes. Were a laboratory of this kind established, samples of sputum of cases suspected of having tuberculosis could be examined by an expert in such work. The examination of sputum alone would require the entire time of one pathologist. Many other problems of diagnosis are constantly requiring such help as is afforded by a laboratory of this kind.

There is at present only one supervisor of schools employed in the work of developing to greater efficiency the teaching of home sanitation by field matrons and teachers of housekeeping, and the field has not yet been covered by her, although constantly engaged in it for the past three years. This subject is one of the most important of all those to be taught in the Indian schools, and has not yet received the attention which it deserves.

The medical force as it now stands is inadequate to cope with the present health situation, and material improvement must come through substantial increase in number and salaries of the medical corps. Indian-service physicians are the poorest paid in the Government service, and yet their work is fully as difficult and, in many instances, involves greater hardship than any other service except during times of war. There are at present 52 contract physicians and 86 regular physicians. The contract physicians receive an average of $575 per year and the regular physicians an average of $1,186 per year. The contract physicians do not have the time nor do they receive sufficient compensation, to enable them to render the amount of medical work required, and it is impossible also to obtain efficient and satisfactory regular physicians at the salaries now paid as is desired. There is very little chance for promotion of physicians, and no annual leave is allowed them unless a substitute is furnished and paid for. Instead of the present low salaries and practical impossibility of receiving promotion, physicians should be graded and allowed increased compensation commensurate with their services. Comparing the salaries received by physicians in the Indian service with those of any other branch of the Government, it is at once apparent that the class of men attracted by the Navy, Army, and Marine-Hospital Service is of much higher grade than that entering the Indian Service. The following is a comparative table of pay and list of medical officers of the United States Navy, United States Army, the Public Health and Marine-Hospital Service, and the Indian service:

United States Navy.	United States Army.	United States Public Health and Marine-Hospital Service.	United States Indian service.
Surgeon General, $6,000.	Surgeon General, $6,000.	Surgeon General, $5,000.	Medical supervisor, $3,000.
Medical director, $5,000.	Colonel, $5,000.	Assistant Surgeon General, $4,060.	Assistant medical supervisor, $2,200.
Medical inspector, $4,500.	Lieutenant colonel, $4,500.	Senior surgeon, $3,500.	Ophthalmologist, $1,800.
Surgeon, $4,000.	Major, $4,000.	Surgeon, $3,500.	Physicians, from $900 to $1,400; average, $1,168.
Passed assistant surgeon, $2,640.	Captain, $2,400.	Passed assistant surgeon, $2,000.	
Assistant surgeon, $2,200.	First lieutenant, $2,000.	Assistant surgeon, $1,600.	Entrance salary, $1 000.

It is proposed to increase the compensation and number of Indian-service physicians in accordance with the following scheme, which shows the medical positions authorized at present and the new positions or increases in salary recommended:

Positions authorized.	No.	Unit salary.	Total salary.
Medical supervisor	1	$3,000	$3,000
Physician expert	1	2,200	2,200
Assistant physicians (ophthalmologists).	2	1,800	3,600
Assistant physician	1	1,600	1,600

Traveling expenses	....	.....	10,800

The entrance salary for nurses in the Indian service is below that for any other branch of the Government service, and the average compensation and allowances given them is also smaller. The civil-service register for nurses is constantly depleted, and vacancies remain unfilled. There is great demand for more and more competent nurses and it is proposed to increase their average salary $60 per year.

Many of the field matrons have rendered faithful service for years at a fixed salary, have earned promotion, and should receive it. The above sum will permit the slight increase desired. It is proposed also to raise the standard of

requirements for eligibility and to secure applicants better trained to teach sanitation. Unless the entrance salary is raised it will be impossible to secure the employees desired. The apportionment of the present appropriation for industrial work and care of timber, from which field matrons are paid, does not permit any increase in the salaries this year.

Better transportation facilities are needed in many places and should be supplied. Other funds are not available for this purpose.

It is proposed to increase the efficiency of the medical corps by sending them a few carefully selected journals and books on the diseases most common among Indians.

There are on certain reservations hundreds of Indian homes without either openable windows, floors, or provision for ventilation; and it is on these very reservations that tuberculosis is rife. This is a house disease and thrives best under the conditions found in such homes. It is proposed to use this fund to relieve such situations by rendering these homes sanitary, giving special attention to those where tuberculosis is present, making them not only comfortable to the patient or patients, but also preventing them from becoming foci of infection.

In every Indian school there are pupils predisposed to tuberculosis, many of whom develop the disease and are sent home. Most of these children could be saved if at these schools facilities were available to carry out the modern method of outdoor sleeping. In schools in which this has been tried it has proven thoroughly practicable, and the results obtained justify the prediction that if all delicate children are required to sleep on screened porches while in attendance at school there will be a marked decrease in the morbidity from this disease among Indian pupils.

Play in the open air is now universally recognized as essential to the development of normal, healthy children. Indian schools should be thoroughly equipped this year with simple apparatus to stimulate pupils to spend their leisure in outdoor exercise. This measure alone will prevent the development of many cases of tubercular and other infectious diseases among Indian pupils. This fund will only be used in such schools where other funds are not available.

A wide dissemination among Indians of educational literature containing the essential facts of sanitation and the prevention of the spread of disease is absolutely necessary if the Indians are to be educated to live more sanitary lives.

The above estimates include only those items which are not provided for in the appropriation for the "Relief of distress and prevention of disease, 1913," it being assumed that $150,000 will be allowed.

According to the most reliable statistics obtainable, the death rate among Indians is 160 per cent of that among all other classes in the registration area of the United States, and the mortality from tuberculosis is three and one-half times as great. For the fiscal year 1913 the total funds available to meet these conditions are approximately $334,000.

Stereopticon lectures, both to the school children and to the adult Indians on the reservation, have proved a most effective way of combating disease. Seeing has been found to be believing, and believing has been responded to by action. Such lectures have been given at substantially every school and reservation in Arizona, New Mexico, Oklahoma, Michigan, Wisconsin, and Minnesota. Not a

single one of the 22 States where the Government owes this campaign to the Indians should remain uncovered during the coming year.

Approximately 20,000 Indian children competed for prizes in special tuberculosis study and composition work thereon. All pupils above the second grade were required to take part. The manual of tuberculosis published by the office was used as a basis for the facts taught. Five hundred and sixty-one prizes were awarded—gold, silver, and bronze buttons. The office wrote a personal letter to each child receiving a prize; and some letters received from the children, written apparently at their own initiative, have shown the deeply practical hold this contest has obtained in their lives. One of the most significant showings in these letters is the children's spontaneous statements of the interest developed in their parents in good health through this contest. Thus, we have another proof of the influence of education through children upon parents.

The three tuberculosis sanatorium schools have been distinctly improved during the year. That at Fort Lapwai has been almost completely overhauled and rehabilitated. This school began with a small experimental tuberculosis school for the Nez Percé pupils, and has gradually grown to a modern, well-equipped sanatorium with a capacity of 100, receiving patients from many reservations of the Northwest. It is now under the independent management of a physician superintendent. The Phoenix sanatorium has been enlarged and is becoming a real factor in the fight on behalf of incipient tubercular pupils in the Southwest. At Laguna a high-altitude sanatorium is being developed to meet cases requiring treatment in high altitudes. These three sanatoria have shown that the belief that Indians could not be successfully treated in sanatoria is a fallacy. During the last year there were at these three sanatoria 5 deaths and 116 cases of distinct improvement and 14 cures. In the light of these results the office believes that there should be at least one well-equipped sanatorium in each area of the Indian country marked off from others by distinctive climatic conditions. Thus, all incipient and advanced patients of a reservation who are suffering from tuberculosis should have this help for themselves, and their community should have this protection.

A corps of ophthalmologists is being built up against trachoma. The work of these men is primarily the instruction of the local agency and school physicians in the practical methods of operation and treatment. Under the direct supervision of these teaching physicians more than 3,000 cases have been operated upon this year, and more than 8,000 cases have been treated by the regular agency and school physicians. A pamphlet on the treatment of trachoma, written by two service ophthalmologists, has been distributed to all

physicians, in addition to other publications on the diseases of the eye.

Epidemics of measles have occurred at Jicarilla, Tulalip, Cheyenne River, and several other schools, but no deaths have followed. Isolated cases of smallpox have appeared among Indians at Quinaielt, Wash., and among white persons living near Indian communities at various places. None of these latter cases resulted in infection among the Indians. The general vaccination order issued last year has been strictly enforced. Five cases of epidemic cerebrospinal meningitis, resulting in two deaths, occurred at Fort Sill, Okla., and two cases, with one death, at Collins Institute, Okla. At both places the disease was promptly diagnosed and careful precautions taken against its spread. Flexner's serum was promptly used. The three deaths were from an exceedingly virulent and fulminating type. At the time of these occurrences the disease was epidemic among the whites in Oklahoma and Texas.

Recently systematic cooperation with State boards of health began. Every superintendent throughout the service has been instructed to cooperate heartily, and the State boards have as heartily responded. One of the first steps which will be taken, if Congress grants the necessary money, will be to appoint traveling dentists for all of the schools, or to make contracts with local dentists where practicable. A strenuous campaign should be made among the teeth of the Indians. Every child ought also, in my judgment, to be examined for adenoids.

Physicians in the Indian Service should be graded as they are in other branches of the Government service and, in the hope of money enough from the Congress to employ them, the entrance requirements in the civil-service examinations should be raised, so that better new men for the service can be secured. Liberal provision should be made for annual and educational leave for these men, as that is essential to their practice and growth as physicians. This is peculiarly true, due to the isolation of physicians on many Indian reservations. Series of well-illustrated pamphlets are being prepared on practical sanitation, methods of spread of disease, and personal hygiene, and, most important of all, real constructive home making. A great increase should be made in our present stock of photographs, moving pictures, and stereopticon slides for lecture work. All school papers are being encouraged to publish health items in such effective manner as has already been done at several places, especially at the Cheyenne and Arapaho superintendency.

Another competitive composition contest is being prepared for this year, this time on the subject of home making. This will be the important health study among the children this year as tuberculosis was last.

No work is nobler or more necessary or more trying in the work of the Indian Service than that of the field matrons and women industrial teachers. During the past year 5,000 Indian families have been instructed in the care of children and homes by 78 field matrons and their assistants. The help given by these women varies from instruction in sanitation to the supervision of expenditures and the settlement of domestic difficulties. They save the lives of many children. This work of the women among the Indian women in their homes should, I believe, be erected into a special department of the Indian Service. Conferences among the field matrons, as conferences in other lines of our work, have proved most productive of increased efficiency. As one result of the conference of field matrons held during the last year, they are cooperating in the collection of data on the plays and games of Indian children at home, with a view to laying sound foundations for the physical needs as to recreation of the Indian children in the schools. A special civil-service examination has been planned for a position in the Indian Service of teachers of housekeeping, in order to try to obtain more and more competent employees for this branch of the service. This examination will be extremely practical. It is planned to send circulars announcing this examination among all the settlement workers in the country, and among the workers of all other organizations of the country engaged in practical betterment of living conditions, whether of a religious character or not.

INDUSTRIES.

At the present time there is not sufficient statistical information before the office to show precisely what has been done in industrial lines during the past year. From the reports which are being received and analyzed as rapidly as possible, there appears, however, to have been a steady increase in farming, stock-raising, and industries generally. In some places this increase has amounted to a genuinely popular movement. It must be remembered that Indians are not as antagonistic to work, and particularly to farming, as has often been represented. In time long ago, before the aggressions of whites, and before the constant movement of Indians from place to place kept their roots torn up, the Indians were in a very great number of cases efficient agriculturists, at least to the extent of a year-by-year self-support. Now that their homes are becoming really their own, and the Government is doing everything its means and skill permit to assist them at getting a start, these roots are striking more and more into the ground with fresh vigor.

During the last season the determination of the Indians to work their farms was made the more clear by the great obstacles natural conditions placed in their way. In many cases the showing was bet-

ter than the previous year, even in spite of the severe drouths of the early season and the excessive rain late in the summer and fall. This year their unabated activity and the generous spring rains indicate a bumper Indian crop.

At Fort Hall, Idaho, 15 Indians planted 113 acres in sugar beets, raising about 463 tons, which they have delivered at the factory in excellent condition. In nearby beet fields of white farmers Indian women have had ready employment and have received $1.50 a day. At this reservation the Indians have taken to farming with considerable enthusiasm; each year they have increased the acreage sowed. In two districts, Rossfork and Ponca Creek, the Indians farm all land which is suitable for cultivation; although they have received little direct assistance from the Government they own thrashing machines, mowers, and reapers.

At the Winnebago Reservation, Nebr., 181 Indians have actually in crops 11,800 acres. Estimated very conservatively the value of the crops now standing will be $105,000; the value of the Indians' crops last year was $90,000. The appreciation of these Indians of the advantages of living on their lands appears in their desire for improvements; at the present time nine full sets of farm buildings are under construction, costing from $1,200 to $2,900 a set.

At the neighboring reservation of the Omahas 40 more Indians are farming this year than last year, having in cultivation 16,000 acres, an increase for this year of almost 2,000 acres.

In the western portion of the Yakima Reservation, Wash., corn crops this year will probably surpass the crops reported last year; between 20,000 and 25,000 bushels of various kinds of grain will be harvested. At Shoshone, Wyo., 138 Indians are now farming as against 93 last year; they have increased the crop of oats from 1,254 to 21,510 bushels, the crop of wheat from 136 to 2,000 bushels, and the crop of alfalfa from 1,800 to 3,200 tons.

Although last year's drought seriously injured crops at Kickapoo Reservation, Kans., the Indians this season planted 7,500 acres in corn, wheat, and oats, an increase of at least 1,500 acres. Notwithstanding the Indians at Crow Creek, S. Dak., have faced two successive crop failures, and at best have land which is not particularly adapted for farming, they this spring plowed 3,000 acres, 680 acres of which was broken for the first time.

At Fort Yuma, Ariz., where allotment has recently been made, a number of Indians began clearing their allotments as soon as the surveyors left the field. Since March, 17 Indians have been getting water from the irrigation system, most of them having excellent farms with good crops.

In eastern Oklahoma 8 expert farmers and 4 additional farmers have been employed among the full-blood population of the Five

Civilized Tribes. In endeavoring to persuade the Indians to clear and to farm their lands these employees have had the cooperation of the local representatives of the Department of Agriculture and of the State board of agriculture. In eastern Oklahoma the Department of Agriculture has had 31 Indian demonstrators and 235 Indian cooperators; in success and progress these Indians have equaled and in some instances have surpassed their white neighbors.

In an attempt to make each Indian child's training directly preparatory to the position in which he will find himself upon leaving school the superintendent at Union Agency, Okla., is furnishing the superintendents of the various schools with information about each student's lands, their fair market value and their present rental value, and the crops for which the land is most suitable; it will be the duty of the superintendents to impress upon each student some conception of the value and the utility of his property and to give him some knowledge about how to farm and manage his land.

While there has been some industrial progress at substantially all the reservations, tentative plans must be formulated for the more rapid upbuilding and advancement at many places. This is true among the Chippewa Indians in Minnesota, the Sioux of North and South Dakota, the Mission Indians of California, the Navajo of Arizona and New Mexico, the Washoes of Nevada, and Pueblos of New Mexico, and at Campo, Camp Verde, Cheyenne River, Colville, Colorado River, Cherokee (North Carolina), Crow, Cushman, Digger, Fallon, Flathead, Fond du Lac, Fort Apache, Fort Belknap, Fort Bidwell, Fort Hall, Fort McDermitt, Fort Mojave, Fort Peck, Fort Yuma, Grand Portage, Kaw, Keshena, Kiowa, Klamath, Lac du Flambeau, Moapa River, Navajo Springs, Neah Bay, Nevada, Otoe, Pawnee, Pipestone, Pottawatomie, Red Cliff, Red Moon, Sac and Fox (Iowa), Sac and Fox (Oklahoma), San Xavier, Seger, Seneca, San Carlos, Shawnee, Shivwits, Siletz, Southern Ute, Truxton Canon, Tulalip, Tule River, Turtle Mountain, Umatilla, Walker River, Warm Springs, Western Shoshone, Yakima, and Yankton. Supervisors are in the field investigating conditions among the Apache Indians under San Carlos and Fort Apache Schools and the Chippewa Indians in Minnesota, with the view to mapping out practical plans for the industrial advancement of those Indians.

On February 7, 8, and 9 a conference was held at the Navajo Indian School in Arizona for the purpose of discussing various subjects and problems common to all the Navajo reservations and the formulation of programs for the future upbuilding of these jurisdictions. The supervisors, superintendents in charge of the Navajo and adjacent reservations and schools, and a number of Indians, employees, and missionaries working among the Indians in that section of the country were present. There were as many as 50 to 150 Indians

present at some of the sessions. The discussion of the various topics was informal and the interest manifested was most satisfactory. The consensus of opinion of those who attended the conference seems to be that much good will eventually come from the meetings. The Navajo county should be handled as a whole.

A conference of superintendents and supervisors is contemplated for the discussion of the conditions among the Sioux Indians, and the office is endeavoring to systematize the work and arouse greater activity on the part of its field employees and Indians at the various reservations with the view to improving conditions.

General plans for future work have been formulated at Fort Berthold, Blackfeet, Havasupai, Fort Lapwai, Hoopa Valley, Jicarilla, Kaibab, La Pointe, Leupp, Moqui, Pima, Ponca, Roseburg, Shoshone, Sisseton, Tongue River, Uintah and Ouray, Five Civilized Tribes, Western Navajo, Winnebago, and among the nomdic Papagoes under the San Xavier superintendency, and the nonreservation Indians of Nevada and Utah.

The two supervisors of farming appointed during the fiscal year 1911 were continued during the year, and one other supervisor was appointed and assigned to the special work of developing surplus water for stock purposes on the Western Navajo Reservation. Two hundred and fifty-one men, forty-one of whom were classed as expert farmers, were employed to oversee and direct the activities of the Indians in agricultural pursuits. A number of these employees were men of Indian blood. Early this spring a letter was sent to the superintendents in charge of all reservations where farming and stock raising are engaged in with the view to arousing greater activity on the part of the employees, and Indians as well, in the promotion of farming and stock raising, or of some other self-supporting industry where the lands are not adapted to agriculture.

A blank form, under the caption of "Industrial status report," was prepared, upon which it is proposed to keep an accurate record of each Indian family, showing what each member thereof is doing, the acreage of land, the buildings, equipment and stock available for the use of each and the purposes for which they are actually used, crops planted and raised, the increase of live stock, the disposition of the products of the farm or rancheria, and what each Indian needs in the way of equipment or live stock in addition to what he has to enable him to earn a livelihood. By this means in another year more accurate and comprehensive data, in concise form, will be available in the records at the various agencies than has been in the past. These records will enable the superintendent to study intelligently the actual conditions with which each Indian is confronted, and he will be in a position to formulate systematic industrial programs for the upbuilding of the interests of the Indians.

along the most practical lines. On April 29 another letter was issued with the view of placing before the Indians, and employees as well, a concise statement of some of the problems with which we must deal, and suggestions were made of some of the avenues through which much can be done to help the Indians help themselves to advance to a state of self-support and fitness to take the responsibility of citizenship.

The character of houses in which the Indians live is a matter closely connected with their industrial progress. A book of drawings is in course of preparation showing several different styles of cottages for Indians, and of barns and outbuildings as well. Working plans will be furnished superintendents and reservation farmers which can be shown to Indians who contemplate putting up improvements on their lands. By this means better planned, better constructed, and more sanitary buildings will be obtained.

STOCK RAISING.

In addition to the farmers, 47 stockmen were employed at those reservations where the Indians have important stock interests. The duties of farmers and stockmen are identical, so that those employees carried as farmers oversee also the live-stock interests of these Indians and those carried as stockmen superintend also activities in farming.

Plans for the upbreeding of the Indian stock along practical lines are now under way. As a first step in that direction a letter has been sent to the reservation superintendents, in which their attention is especially called to the necessity of upbreeding the horses and the elimination of the worthless ponies. A plan of capture and control and upbreeding has been also formulated and sent to the employees at the various reservations for their information and guidance.

One of the principal subjects of discussion at the Navajo conference, referred to under the subject of farming, was the live stock belonging to the Navajo Indians. It is estimated that the Navajo Indians own the following stock:

	Values.
327,300 horses (ponies)	$3,312,400
3,290 mules	98,000
4,900 burros	13,250
27,700 cattle	571,500
140 bulls	3,400
1,429,821 sheep	2,924,960
318,955 goats	497,910

It is estimated that 3,375,000 pounds of wool, valued at $429,375, were clipped from native sheep, and 293,463 pounds, valued at $35,664, were clipped from graded merino sheep.

A plan has been outlined for improving the breed of sheep belonging to these Indians by the introduction from time to time of a limited number of high-grade Rambouillet and Cotswold rams into their flocks, with the hope that the improvement in the native sheep may be so apparent that the Indians of these reservations will, of their own volition, adopt methods of improving their flocks. The aim is not only to increase the size of these animals so as to make them more desirable for mutton, but to improve the quality and amount of the wool so that the present clip of 3 or 4 pounds per animal may be increased to at least double that amount.

The Indians of the Blackfeet Reservation sold, during the last six months of the fiscal year 1911 and the first six months of the fiscal year 1912, 6,598 head of cattle, for which they received $292,160.96, and 1,044 head of horses, for which they received $49,949, making a total for all sales of $342,109.96. An association known as the Blackfoot Stock Protective Association was organized on April 15 with a membership of 43, which was soon increased to 60 members. Any Indian on the reservation may become a member by subscribing to the by-laws and paying the required membership fee of $5 per annum. The members are required to report to the superintendent the names of any person or persons detected in killing or stealing of cattle of any kind. There is a similar association on the Flathead Reservation, composed of white settlers and Indian stock owners.

Three years ago about 80 head of 2-year-old heifers were issued to the Indians at the Kaibab Reservation. Since this issue was made the number has increased to more than 350 head. During the month of June 42 head were sold, for which $1,330 was received, and there are now on the reservation about 335 head belonging to the Indians.

At Siletz, Oreg., a cooperative creamery has been established in which membership is open to the Indians. One Indian already has stock in the creamery, and others are contemplating becoming members. At Mescalero the Indians sold 3,175 lambs during the year, at $2.75 per head, or a total of $8,731.25. This is the highest price obtained for lambs in the State of New Mexico. The wool clipped from the sheep by these Indians amounted to approximately 30,500 pounds, which was sold at 13 cents per pound, or a total of $4,041.25.

AGRICULTURAL FAIRS AND ASSOCIATIONS.

Fairs were held at Watonga, Okla., under the auspices of the Cheyenne and Arapaho Indians, at Gila River, Cheyenne River, Crow, Fort Belknap, Fort Totten, Fort Berthold, Keshena, Lower Brule, Nevada, Cattaraugus (N. Y.), Pine Ridge, Santee, Sisseton, Tongue River, Fort Peck, Rosebud, and Southern Ute Reservations. While no fair was held last year at the Blackfeet Reservation, a

display of agricultural products was made at the agency. A tract of land has been set aside for fairgrounds at this reservation. At a number of the reservations the organization of a permanent fair association is contemplated. During the year Indian fair associations have been organized among the Cheyenne and Arapaho Indians in Oklahoma (under the Cheyenne and Arapaho, Seger, Cantonment, and Red Moon Schools), and at Fort Totten, Sisseton, Standing Rock, and Fort Peck. Those at Crow and Cattaraugus, N. Y., which were organized in previous years, are maintained.

The Indians at Pima, Nevada, Sisseton, Tongue River, and Fort Belknap Reservations, in addition to their own fairs, participated in the regular county and State fairs. Last year, at the Arizona State fair, a Camp McDowell Indian girl took first prize for needlework and plain baking, and another Indian from this reservation took first prize for the best saddle horses. Some of the Indian exhibits sent to the State fair at Fallon, Nev., won prizes. At some of the Mission reservations in California, where picnics, ordinarily knows as fiestas, have been held at frequent intervals during the year, exhibits of agricultural products were made.

At a number of reservations, while the Indians had no fair of their own, they participated in fairs held by their white neighbors. This is true at San Xavier, Fallon, Fort Hall, Flathead, Oneida, Pawnee, Ponca, the Pueblos of New Mexico, Sac and Fox, Iowa, Umatilla, the Five Civilized Tribes, White Earth, and Winnebago. At the Minnesota State fair the booth of the Becker County exhibits was in charge of a mixed-blood Indian from the White Earth Reservation. The business men and ranchers in the vicinity of Coachella, Cal., organized a fair last year in which the Indians of the Martinez Reservation took an active part. A farmers' institute was held at the same time, and a demonstration train from the State Agricultural College was also stationed at a point near the fairgrounds.

Many Indians among the Five Civilized Tribes received prizes at the county fairs held at Hugo and Ardmore, Okla., while at the New State Fair held at Muskogee, one of the best agricultural exhibits was that of a mixed-blood citizen of the Cherokee Nation.

A farmers' meeting was held at Muskogee on February 16 and 17, under the auspices of various organizations carrying on industrial work in Oklahoma. Representatives of the Oklahoma Board of Agriculture, the Oklahoma Agricultural and Mechanical College, the Bureau of Plant Industry, and the expert farmers in our service took an active part. An Indian farmers' club has been organized. A meeting of the full-blood Indian farmers was held at the Goodland School, near Hugo, on December 30, and the interest manifested was good.

65989—13——3

A farmers' institute, for both Indians and whites, was held at Winnebago in February. Subjects pertaining to the home as well as the farm were discussed, and the talks made were full of practical value. Speakers were sent from the State University, and a lecture on good roads, illustrated by stereopticon slides, was one of the best features of the institute. Local prominent whites and Indians and agency employees also made addresses on various subjects.

At the Potawatomi Reservation in Kansas, farmers' meetings were held on April 30 and May 3, and a good-roads meeting was held on May 14. At these meetings the expert farmer gave practical talks on various subjects pertaining to farm life, with blackboard illustrations. A good-roads club was organized, and a circular of hints to farmers was promulgated for the information of the Indian farmers.

A lecture on poultry, illustrated by lantern slides from the Department of Agriculture, was delivered at the Cheyenne and Arapaho School in Oklahoma on May 24 and 25 by the expert farmer. This lecture was repeated at Watonga and Geary.

A course of talks covering a period of about three months was given at the Fond du Lac Reservation on subjects of farming, dairying, poultry raising, etc.

The Oneida Indians attended the annual farmers' institute at Depere, at which lectures were given by experts from the University of Wisconsin with special reference to corn breeding and the care of live stock.

A farmers' club has been organized at Oto, and meetings are held in the school buildings for the discussion of topics of general and agricultural interest.

The Indian Farmers' Association was organized at Ponca. Weekly, and later biweekly, meetings were held, at which the superintendent and farmers gave talks on farming topics, which apparently were productive of much good.

At Red Cliff six Indians have become members of the local fruit growers' association, and regularly attend the meetings which are held on Saturdays.

At Santee cash premiums were given to the boys having the best "grade" of corn.

Two active farmers' clubs and one temperance club have been organized at Sisseton. A farmers' institute was held also, and many Indians were in attendance.

A farmers' association has been organized in what is known as the Cannon Ball district on the Standing Rock Reservation.

Farmers' institutes are held at the Fork Peck Agency, and large numbers of Indians attended the meetings during the year. The program usually consists of instructions given by experts from vari-

ous parts of the State in farming, poultry and stock raising, dairying, and beekeeping, and a general discussion is engaged in by those present.

A corn contest was held at the Cheyenne and Arapaho Indian fair, in which the best farmers under the Cheyenne and Arapaho, Cantonment, Seger, and Red Moon Schools participated. Prizes were given for the best yield obtained at each reservation, and then the various reservations entered into a competition.

TESTING AND DEMONSTRATION WORK.

During the year experimentation in agriculture was carried on at the Bishop, Colorado River, Fort McDermitt, Kaibab, Blackfeet, Nevada, Pala, Pima, San Juan, Shivwits, Uintah, Walker River, Zuni, Leupp, and Martinez Reservations.

The testing and demonstration farm at Sacaton, Ariz., which was started under the cooperative agreement of 1907 between the Departments of the Interior and Agriculture, was continued. The benefits being derived from this farm can not be overestimated. Many useful plants are being developed, and will in time not only benefit the Indians on the Pima Reservation, but also all that section of the country where like conditions prevail. Already the superintendents in charge of the Phoenix School, and the San Carlos, San Xavier, and Camp McDowell Reservations are taking advantage of discoveries made at the Sacaton farm. The superintendent at San Carlos procured from the farm a variety of seeds consisting of Egyptian cotton, sorghum, milo, maize, Bermuda onions, two varieties of corn, grapes, dates, pecans, figs, and pomegranates for testing on the school farm. The superintendent at San Xavier procured some sorghum seed for testing in his locality. He is also issuing to his Indians cuttings from pomegranates, pear, peach, apricot, apple, and hardwood trees, and grapes. Several progressive Indians on the Camp McDowell Reservation have taken up the culture of Egyptian cotton.

Nineteen bales of cotton were raised on the testing and demonstration farm at Sacaton, weighing, after ginning, 9,459 pounds, which was sold to the Clark Thread Co., of Newark, N. J. Seventeen bales, weighing 8,397 pounds, brought 20¼ cents per pound, and 2 bales, weighing 1,062 pounds, brought 20⅜ cents per pound, a total of $1,969.25. A weighing charge of 5 cents per bale, or a total of 95 cents, accrued against the shipment, making the net proceeds $1,968.30. The Indians raised 5 bales, weighing 2,588 pounds, which was sold to the same company for 20¼ cents per pound. The weighing charges on this shipment amounted to 25 cents, and the net receipts were $540. Two thousand eight hundred pounds of cotton seed were produced. Six thousand pounds belonging to the Indians and 14,350 pounds belonging to the Government farm were sold at 3

cents per pound. Six thousand pounds were fed to stock because of its being frosted. One thousand six hundred pounds were kept for planting on the Sacaton and Pima Indian farms. Two hundred and fifty pounds were sent to the Phoenix School and 600 pounds were sent to the Salt River Reservation, under Camp McDowell superintendency, for planting on the Indian farms. A greenhouse has also been established at the testing farm for the purpose of raising plants for distribution among the Indian farmers.

At the San Juan Reservation cooperative work was carried on in conjunction with the Department of Agriculture, and tests were made with various grains, fruits, vegetables, and plants. Unfortunately the floods of last October did a great deal of damage to the experimentation farm, necessitating considerable new leveling and the removal of sediment before operations could be begun this spring. Many young trees were buried deep in the mud. Twenty-seven varieties were replanted this spring. Field seeds, such as cowpeas, soja beans, and vetch were planted again this spring. A test is also being made of the Himalaya berry, which is highly recommended.

At Shivwits four small patches of land, comprising about 10 acres in all, have been cleared, plowed, and seeded to grain for the purpose of testing the possibilities of dry farming in that section. The Indians manifested much interest in the undertaking, and 80 acres have been laid off for future subdivison into 10-acre plots for cultivation by them.

At Kaibab, in the arid region, where last year 82 bushels of corn were raised on a 2-acre tract, experiments in arid farming were continued on a larger scale. Cane for forage, kaffir, oats, barley, alfalfa, and broom grass were planted.

At the Colorado River Reservation oranges, lemons, apples, apricots, cherries, grapes, olives, peaches, pears, plums, blackberries, strawberries, walnuts, Egyptian cotton, tobacco, lentils, and various other trees and plants were set out. While many trees and plants died, others are doing well and the tests are being continued.

At the Blackfeet Reservation tests were made of two varieties of alfalfa, broom grass, timothy, and some of the hardier vegetables.

At Nevada, Fort McDermitt, Bishop, Pala, Zuni, Walker River, Martinez, Uintah, and Ute tests were made with various kinds of fruit and shade trees, vegetables, and forage crops.

The demonstration farm provided for in the act of June 1, 1910 (36 Stat. L., 455, 456), was started at the Fort Berthold Reservation this spring. An expert farmer is in charge of the work. Barns and other necessary buildings were started and 1 stallion and 6 mares and 1 bull and 6 cows were purchased. To this live stock it is intended to add hogs and poultry when suitable buildings have been provided for their accommodation. Alfalfa, oats, potatoes, corn, and

flaxseed were planted this spring. The principal object of this farm is not so much to show the Indians what can be accomplished as to raise pure seed and a good grade of breeding stock to be sold to the Indians at cost, so that they may improve their farm products and replace their inferior breeding stock with pure-bred stock. The business committee of the tribe has indorsed the plans under way, and the Indians generally are much interested in the project.

At the Lower Brule Reservation 25 acres of land was set aside, and this tract is known as the dry farm. This farm is conducted for the purpose of demonstrating to the Indians what can be accomplished by proper cultivation of the soil on their own farms.

At Santee a tract of 15 acres is used for demonstration purposes, from which the Indians obtain pure seed corn. Hogs are also being raised for sale to the Indians at moderate prices in order to enable them to get a good start in the hog industry.

Demonstration farms were also maintained at a number of other Indian schools in connection with the regular school farm work.

REIMBURSABLE FUNDS FOR PROMOTING AGRICULTURE.

At this time there are 154 accounts outstanding against the Indians on the Fort Belknap Indian Reservation, in Montana, by reason of their participation in the use of the $25,000 reimbursable fund appropriated by the act of April 30, 1908 (35 Stat. L., 70, 83). These accounts represent purchases of agricultural implements, fence wire, and seed. Under the act of March 3, 1909 (35 Stat. L., 781, 795), the moneys repaid by the Indians into this fund are available for reexpenditure for the purposes stated in the act of 1908. The total expenditure made from the fund since its establishment amounts to $29,768.26. Fifteen thousand dollars of this amount has been repaid by the Indians and is now available for reexpenditure. During the year the Indians have been reluctant to make use of the fund, giving as their reason that they did not care to go into debt.

The Indians of the Tongue River Reservation have been particularly active during the year in the use of the $15,000 reimbursable fund appropriated by the act of April 4, 1910 (36 Stat. L., 269, 277); $14,826 have been expended in the purchase of agricultural implements, mares, stallions, seeds, and nursery stock. Sales have been made to the Indians amounting to $12,466.82, and the collections made to date amount to $5,283.15.

During the year approximately $5,443.20 has been expended from the $10,000 reimbursable fund established at the Blackfeet Reservation, in Montana, from "Indian moneys, proceeds of labor." This money was expended for fence wire and in the purchase of supplies and for employment of labor required to operate the steam traction

plow purchased during the preceding fiscal year for the purpose of breaking up the low land for future cultivation by the Indians.

The sum of $30,000 appropriated by the act of March 3, 1911 (36 Stat. L., 1058, 1061), for the purpose of encouraging industry among Indians was apportioned in various amounts ranging from $1,000 to $5,000 to the Flathead, Fort Totten, Yakima, Pueblo (Albuquerque), Pueblo (Santa Fe), Fort Mojave, Fort Yuma, Malki, Martinez, Pala, Pechanga, San Xavier, Soboba, Walker River, and Shawnee Reservations. The superintendents in charge of the Yakima, Malki, and Fort Totten Reservations have reported that they could not make beneficial use of the amounts apportioned to them, and the money is being apportioned to other jurisdictions. Expenditures have been made in the purchase of farming implements, equipment, wagons, and breeding stock, and while the actual number of Indians who participated in the use of the money at the various reservations is not known at the present time, the reports received indicate that the money is serving a very useful purpose.

INDIAN ART.

Plans are being formulated for the preservation of those native industries that can be properly classed as arts. The making of Navajo blankets, of the high grades of basketry and beadwork, and of pottery are arts which should be preserved and fostered by every means. It is estimated that the annual output of the blankets made by the Navajo Indians from native wool approximates $675,000, and from Germantown wool $36,000; and that 843,750 pounds of native wool are annually worked into blankets by the Navajos.

There are expert basket weavers at a number of reservations, particularly among the Pimas and Apaches in Arizona and some of the tribes in California. The work of an Indian by the name of Dat-so-la-lee, a member of the Washoe Tribe, is famous, and several of her masterpieces have sold for from $150 to $250. A merchant in Carson City, Nev., now has her best basket, valuing it at $1,500.

SCHOOLS.

The boarding schools have been well filled, the enrollment in most cases being in excess of that of last year. This had been accomplished by little or no solicitation on the part of superintendents, many reporting that they made no efforts to procure pupils and were forced at times to refuse admission to eligible children. The plan inaugurated a year ago of having reservation superintendents report to this office a list of pupils eligible for transfer to nonreservation schools is largely responsible for this improvement.

Steps have been taken to effect the transfer of pupils from one reservation boarding school to another when the home boarding school is filled and a transfer to a nonreservation boarding school is impracticable. Each reservation superintendent has submitted a school census, and from these the office will be enabled to make a careful study of the educational needs on each reservation.

A larger number of Indian pupils have been enrolled in the public schools than ever before. It is frequently reported that they rank with the white children in their academic work. Indian pupils are also improving in their habits of cleanliness, for they now come from more sanitary homes. These two facts have enabled them to earn the respect of the white people in their school associations.

In eastern Oklahoma alone contracts for the education of Indian pupils in the public schools were made with 225 school districts. These contracts were limited to those pupils who belong to the restricted class of the Five Civilized Tribes. This was done because it was presumed that the children of the unrestricted Indians were entitled to attend the State public schools. This assumption is now, however, untenable in view of the fact that the Supreme Court in the cases of Choate *v.* Trapp and English *v.* Richardson has decided that much of the land now held by these citizen Indians is nontaxable and it will be for several years to come. This presents a new question, and it will probably make it necessary for the office to make further provision in the way of day-school facilities for the Indians of eastern Oklahoma.

Probably the most noticeable example of what it is believed must be the "final step" in the education of the Indian youth of the country has been the enrollment of Indian children in the public schools of Washington and Montana, where more than 300 Indian children were enrolled in public schools in and adjacent to the Yakima and Flathead Reservations. It has been but a few years since these reservations were thrown open to settlement by white people, and already more than 20 good public schools have been built in the Yakima country and more than 30 in the Flathead country. Indian children have been enrolled in all grades below the eighth and have been cordially received and well treated. When it is realized that the Yakima and the Flathead Indians are nearly all pure Indian and that it has been but a very short time since their reservations were opened to settlement, it must be acknowledged that all the Indian child needs is a chance equal to that of the white child. The results on these reservations demonstrate this fact and definitely point to the public school as the "way out" for Indian education.

In the academic work the State courses of study have been followed, and the instruction that is now being given in our schools is comparable with that given in the best corresponding schools for white

children. Particular attention has been given to the instruction of Indian pupils in English early in their school life. It has been felt that heretofore teachers have been content with very meager accomplishment in the acquiring of a vocabulary by the first and second grade pupils. No teacher should be content unless she has led her pupils into a knowledge of a large vocabulary during the first school year. The early years of child life are the most valuable in acquiring a language, and special effort has been made to increase the efficiency of primary instruction in our schools.

There were purchased for use in Indian schools 30 stereopticons with reflectoscopes. These are just such machines as are used in giving illustrated lectures and are to be used not only for entertainment, but for purposes of instruction. Something like 7,500 slides have been purchased, covering all features of educational work, travel, biography, history, commerce, manufacturing processes, the growth of industries, etc. These will be used as far as practicable in each school, and, with such additional purchases as may be made from time to time, a great source of valuable information will have been provided. To these slides will be added many others made from photographs taken by our school supervisors, who now use cameras in connection with their inspection work. Such scenes or activities at Indian schools as are of educational value or interest to other schools will be used under this general plan.

The contest among the schools in the writing of essays on the subject of tuberculosis has already been referred to on page 25.

Special attention has been given to the instruction of Indian girls. The home conditions of the Indians is one of the most unsatisfactory features of the Indian problem. To affect this directly the character and efficiency of the training given the Indian girls must be improved. The schools have made a careful study of all phases of education which bear directly on the improvement of the girls. It is realized that for them even more than for the boys the instruction should be of an intensive form, for at best girls can be kept in school only for a few years after they have developed into womanhood. Domestic-science cottages have been constructed at a number of schools. Cottage homes are also common. In these a half dozen or more girls live as a family for two or three months at a time, performing all the household duties in connection with the care of the house and the preparation of meals for not only themselves but others, either pupils or employees. Special attention has been given to procuring efficient women instructors who can direct Indian girls in such practical training as they should have in home making.

Industrial instruction for boys has already been given very careful consideration, and this feature of the school work continues to be the marked characteristic of Indian schools.

More emphasis has been placed on the physical development and health of Indian pupils during the past year than at any other time during the history of Indian education. Outdoor playground apparatus has been furnished for many of the boarding schools and for even a large number of day schools. The Russell Sage Foundation, in cooperation with the National Recreation and Playground Association, appointed a committee to cooperate with this bureau in a study of the communal life of Indians, particularly in respect to their social and recreational activities. This committee was headed by Prof. George E. Johnson, of Pittsburgh, Pa., superintendent of the recreation and playground association of that city. He has given special attention to these phases of Indian life in their relation to the present educational scheme for Indians, and his interest and assistance in this respect has added new zeal and definiteness to this subject. Prof. Johnson made a two months' visit to the Indian field for the purpose of ascertaining our needs. This is the beginning of a special effort on the part of the Indian Office to deal more effectively with the social and recreational development of Indians through the schools.

Of all the sleeping porches constructed at Indian schools prior to June 30, 1912, approximately 90 per cent were constructed or under construction during the year 1912 itself. In this way we have kept pace with our ruling of last year, that the cubic air space for each child in dormitories should be 500 instead of 400 cubic feet; thus producing at once better conditions within the buildings and adding the inestimable advantages of outdoor sleeping at 17 schools during the last year.

Indian-school employees are alive to the necessity of imparting wholesome instructions in all those virtues which are essential in any young life and in the acquisition of which our schools are deeply concerned. This sort of training is accomplished not only by the formal instruction the teachers have been directed to impart and in the preparation of which they have been assisted by being given access to the best literature on the subject, but by their own example in their social life in the school.

The human element is one of the most important in the education of the Indians, and the office has given attention to the matter of improving the efficiency of its employees. Teachers were requested to prepare theses on subjects related to their work, and this has resulted in inducing them to do more professional reading than they have been in the habit of doing. They have been encouraged to ally themselves with the educational associations of their community and to adopt the most improved methods used in white schools in their classroom work.

In order to induce better qualified employees to enter our schools, the supervisors have visited educational institutions of a high stand-

ard throughout their districts and acquainted the young men and women who are about to leave them with the needs of the Indian Service in the way of more efficient instructors. The supervisors have reported that the authorities of the institutions have accorded them every opportunity to talk to the students, and it is believed that a larger number of efficiently trained men and women will thus be induced to qualify for our service.

Particular attention has been given to the efficiency reports on employees. A plan has been initiated of gathering more material from the teachers themselves in the way of theses, outlines, etc., and from supervisors and superintendents. This will afford the office an opportunity to distinguish more accurately between those who are doing highly efficient work and should be advanced and those who are clearly inefficient and should be relieved.

There were purchased for the use of teachers and other employees reference libraries for 80 Indian schools. There are 135 volumes in each set, covering every phase of industrial training and allied subjects. These, with such books as were previously available at each school, will afford an ample opportunity for the school instructors to make their work effective and up to date in every respect.

A supervisors' conference was held during the first days of July, 1911, for the purpose of making definite plans for the school year; it adopted an outline or plan for the year's work. With a few exceptions—the designation by the office of a special school in each supervisory district in which to enroll orphans; making provisions for a special examination to secure eligibles for the position of principal; limiting the employment of teachers to the actual school term of nine months; and the study of each Indian reservation with respect to proposed legislation governing the taxation of Indian lands thereon for the support of public schools—every principle set out has been followed closely by the office in administering school matters and may now be considered accomplishments for the school year.

The question of fire protection has been given very careful consideration. Although no loss of life has ever occurred in an Indian school as a result of a conflagration, great precautions have been taken to prevent a fire disaster. In boarding schools both day and night fire drills have been ordered, and regulations have been issued looking to the matter of keeping all fire apparatus in perfect condition. All dormitories are provided with fire escapes, and doors behind which any considerable number of pupils ever congregate are made to open outward. The practice heretofore of locking the girls' dormitories at night has been changed, and superintendents of boarding schools have been directed to install, if necessary, electrical burglar alarms for the protection of these dormitories, thus making it un-

necessary to lock at night the principal means of exit should a fire occur. Not only have the school supervisors reported specifically in reference to fire escapes and fire-fighting apparatus at each Indian school, but they have also investigated conditions at mission and private schools at which Indian children are educated. Indian children ought not attend institutions where there is not offered ample protection against loss of life by fire.

One of our newest activities is to make every effort, both in the school and among the adults on the reservations, in the direction of vocational guidance. Every Indian, like every white man, is best fitted for some one thing. We are trying to find that thing.

The greatest investment the Indian service has is in its so-called returned students. These are students who have been at our larger schools and have returned to live on or near their home reservation. Throughout the Indian country to-day there are probably 35,000 of these returned students. Superintendents frequently consider these persons merely trouble makers, forgetting entirely that the reason they are frequently protestants is that they have seen better things, but have not quite found their own way to them; and I am sorry to say that frequently the greatest obstacle to their finding their way lies in the Government machinery and personnel itself. Taking into account the length of time that each one of these young people spends at Government schools and the cost per year, the Government has an economic investment in each one of these returned students of from ten to fifteen hundred dollars. Every Indian school in the country should consider it a vital part of its daily work to keep track of the students who have attended it. In cooperation with the systems of following up these students, which are being adopted and improved steadily by the schools, the supervisor of Indian employment is performing what is perhaps his most important function. As he puts it—

> These returned students are the hope of the "Indian problem." * * * It is an economic waste not to follow this investment up with at least some correspondence and friendly advice and, if necessary, some financial assistance, at least to the extent of assisting them to reach some favorable point of employment once. We would hardly thing of spending a similar amount in training a race horse and then turn him loose under unfavorable range conditions to shift for himself. We should want at least to make some use of his training.

More and more Indians are likely to turn to day labor or trade for their livelihood, and it is a nice problem with every reservation superintendent to be a true friend to each Indian in his decision whether to tackle his allotment or some outside job. Every effort is being made to use Indians on our Indian service irrigation projects, even where the result is to make these projects a little more ex-

pensive. The educational good to the Indian more than outweighs the additional cost, where there is such. The United States Reclamation Service in the work it does on Indian reservations has done great things in encouraging Indian labor.

In connection with employment in the Indian service I recently issued the following circular:

AUGUST 23, 1912.

To superintendents and all other officers having charge of employees.

SIR: That there is a certain amount of prejudice in the Indian service against employees of Indian blood is a fact greatly to be regretted and one that can not be too strongly condemned. I have repeatedly voiced my sentiment and stand in this matter, and want by this means to make it positive and practical. I must insist that preference in fact, and not in theory only, be shown them in filling all positions in the Indian service for which they may be qualified.

It is not expected that they will be given positions simply because they are Indians, without being at least fairly well qualified for such positions, nor that they will be retained indefinitely, without regard to the quality of service rendered; but where there are those who are reasonably well qualified they must be given the preference in filling positions and encouraged and assisted in meeting the requirements of the positions to which they are appointed. Certainly a lack of proper encouragement will not be tolerated, and any evidence of discouragement or of prejudice against them will be met, if necessary, by drastic measures.

The employing of Indians in the service is simply making use of a large economic investment that the Government has in all those who have been educated in our Indian schools; and in the proper training and developing of the large number who are now and the larger number who should be employed, the department is only supplementing the work of the schools and furthering its policy of educating the Indians in a broad and practical way. This matter will be followed up by this office to see that this idea is not lost sight of.

Section 10 of the act of Congress approved April 15, 1894, reads:

In the Indian service Indians shall be employed as herders, teamsters, and laborers, and where practicable in all other employments in connection with the agencies and the Indian service. And it shall be the duty of the Secretary of the Interior and the Commissioner of Indian Affairs to enforce this provision.

Also, section 6, United States Statutes at Large (vol. 22, p. 451), says:

The President may, in his discretion, consolidate two or more agencies into one, and where Indians are located on reservations created by Executive order, he may, with the consent of the tribes to be affected thereby, expressed in the usual manner, consolidate one or more tribes, and abolish such agencies as are thereby rendered unnecessary; and preference shall at all times, as far as practicable, be given to the Indians in the employment of clerical, mechanical, and other help on reservation and about agencies.

Form 5–253 will be modified and individual efficiency reports of all Indian employees will be rendered quarterly to accompany this blank and will be made direct to this office.

Acknowledged receipt of this circular and keep it active.

In addition to trying to teach each Indian how to work, our schools are also trying to teach what an honest, full day's work involves, in the way of energy and sacrifice.

LAW AND ORDER.

The general conditions of law and order have been good throughout the Indian country, but an affair took place during the course of the year which I deem worthy of special comment. It is with a keen sense of loss, both personal and on behalf of the service, that I have to report that Mr. Will H. Stanley, superintendent of the Soboba Reservation, was shot and wounded by Indians under his jurisdiction on May 2, and died on the morning of May 3. Mr. Stanley had a record in the Indian Service for effective devotion to duty. The Indians charged with this crime are now awaiting the action of the Federal court, and it is to be hoped that their guilt or innocence will soon be determined.

I have continued the fight against gambling among the Indians and am glad to say that our efforts are beginning to bear fruit. By the gradual modification of Indian dances and fiestas, and leavening of them with agricultural fairs, I feel that a step has been made in the right direction, which will result in much benefit to the Indians.

SUPPRESSION OF LIQUOR TRAFFIC.

Through our service for the suppression of the liquor traffic among Indians, which underwent several changes during the past year, the war against the sale of liquor to Indians and its introduction into the Indian country was waged with continuous vigor and successful results.

Mr. William E. Johnson, chief special officer, resigned from the service in September and was succeeded by his assistant, Mr. Harold F. Coggeshall. Upon Mr. Coggeshall's subsequent appointment as superintendent of the Santa Fé Indian School he was succeeded by his assistant, Rev. C. C. Brannon, as acting chief special officer. Later, Mr. Henry A. Larson, one of the special officers, was selected as chief special officer, and has rendered effective and efficient service.

There was available for this work $75,000, and its expenditure had the following results:

New cases during the fiscal year 1912	1,480
Cases pending July 1, 1911	846
Convictions	1,002
Dismissals	267
Acquittals	32

An increased activity was the order of things in several communities, owing to the favorable construction of the law by the courts or legislation by Congress. By reason of the decision of the Circuit Court of Appeals for the Eighth District in the case of United States Express Co. *v.* Friedman, wherein it was sought to compel the

defendants to accept shipments of liquor into those portions of Oklahoma covered by the provisions in the enabling act and constitution of the State prohibiting the introduction of liquor for a period of 21 years, an opportunity for additional operations was presented. As there are many Indians residing in that territory, our efforts have been materially increased to protect them, and the Department of Justice and the chief special officer placed additional deputies in this territory with a view to taking every step practicable to protect them and enforce the law. The same questions of law were subsequently passed upon by the Supreme Court of the United States in its refusal to grant a writ of habeas corpus to one Charley Webb.

Such a situation has developed in Oklahoma that an additional appropriation of $25,000 has been asked and recommended for our operations in that State.

Another peculiar situation developed through the admission of New Mexico into the Union. Congress provided in the enabling act that the sale, etc., of liquor to Indians and its introduction into the Indian country, "which term shall also include all lands now owned or occupied by the Pueblo Indians of New Mexico," are forever prohibited. Congress also provided that the terms Indian and Indian country shall include the Pueblo Indians of New Mexico and the lands now owned or occupied by them. These provisions were embodied in the constitution of that State. Our endeavors to enforce the law brought into question the constitutionality of the legislation of Congress, and the United States district court very recently held that the statute is unconstitutional. An appeal will probably be taken.

The Federal court for the district of Oregon has declared unconstitutional that part of the act of Congress applying the 25-year liquor clause to lands already allotted or disposed of on the Grande Ronde and Siletz Reservations, so that under this ruling our work to protect these Indians will be somewhat hampered.

By reason of the broad scope of the liquor laws applicable to Oklahoma and New Mexico, and the provisions inserted in the legislation extending for a period of 25 years the Federal liquor laws to the reservations which have been or are being thrown open to settlement, many applications for permits to introduce liquor for medicinal purposes and wines for sacramental purposes were received, and as, under the provisions of existing law, authority to grant permits is not conferred upon this department, applicants were referred to the War Department; a provision was placed in the Indian bill, however, declaring it lawful to introduce wines into the Indian country for sacramental purposes.

The situation in Minnesota, so far as our operations are concerned, changed but little. The condition among the Indians has become worse, and reports indicate that the Indians have but little difficulty in obtaining liquor. As about 75 per cent of the Indians in that State are citizens, and operations under the provisions contained in the various treaties with the Chippewa Indians have been held in abeyance pending the final determination of the case of Geralds et al. *v.* Johnson et al., our only hope lies in the enforcement of the State law. Our work along this line, however, has been to a certain extent hampered by the passage of a law by the State declaring it to be a misdemeanor to employ a decoy.

Decoys are in many instances as essential in our work to suppress the sale of liquor to Indians as a special officer. It requires the services of the officer to procure the evidence and the services of the decoy to produce the evidence. There are innumerable instances where the officer has every reason to believe that certain individuals are trafficking in intoxicating liquors with the Indians, and yet it is next to impossible to procure evidence of that fact sufficient to warrant prosecution. In such instances the decoy, who in every instance should be a person about whose race there is no question, is an essential element and renders valuable service.

I have taken steps to eliminate to a certain extent one of the objectionable features of this work, and which has been the subject of criticism. Heretofore many deputy special officers were employed on a fee basis, namely, they were paid a certain fee for a certain service performed. While this method still continues, it has been reduced and the chief special officer authorized in its stead to employ deputy special officers on a monthly basis at varying salaries, at not to exceed $75 per month. It is hoped in the near future entirely to eliminate the fee system.

I ought also to report that we were successful in securing a conviction in this city for the sale of liquor to Indians, showing two things, namely, that the Indian, though hundreds of miles distant from his home, has not lost his lust for firewater, and is able to procure it under the dome of our Capitol, and that the laws as now in force are applicable anywhere.

The Indians continue to appreciate our efforts in their behalf, as shown by the petition of the Lac du Flambeau Indians for the enforcement of the provisions in the treaty of 1842 applicable to Wisconsin regarding the sale of liquor to Indians. The fact that the case of Gerald et al. *v.* Johnson et al. was undisposed of prevented the office from taking any action on their request.

Concerning peyote or mescal, the office has continued its endeavors to obtain information from every available source, and believes that

it is in a position to submit a recommendation for definite action within a short time. The Indians, realizing the stand this office has taken, have submitted several petitions, praying that no action be taken whereby they will be deprived of the use of peyote, and they have sent delegations to Washington, whose sole mission was to present their point of view.

ADMINISTRATIVE PLANT.

The estimated value of the Government plant, including chiefly agency and school buildings, is upward of $9,000,000. The amount of money available for repairs and general up-keep is $180,800, or 2 per cent of the estimated present value. Many of the buildings are reconstructed forts; many of them are in sections of the country where storms are heavy; the occupants of the buildings, both Indians and whites, are perhaps not quite so careful as other communities. These, among other causes, make it a fact that Indian Service buildings have to sustain a higher rate of depreciation than is allowed in the usual tables of depreciation. It is poor economy for the Government, and demoralizing as an example to the Indians, not to keep the buildings up to their value when constructed. I feel that a general provision of 5 per cent of the cost of buildings should be made annually for repairs, and in special cases a larger percentage will be required. After these ordinary repairs are made the depreciation on the service buildings should be carried at 2½ per cent for brick buildings and 5 per cent for frame buildings.

The estimates for repairs and improvements submitted by superintendents for the fiscal year 1913 have been submitted in a much more businesslike manner than in past years. The old habit of asking for an inflated amount in the hope of getting a part of it is happily dying out, and both the office and the superintendents in the field are more fully than ever before realizing that the way to get appropriations from Congress is to make a businesslike statement of actual needs in a form that can be substantiated in every detail.

Much important work has been postponed for several years because it has been found impossible to make the appropriations provided by Congress go round. In construction work, distance from civilization frequently much increases the cost. Contractors find it difficult to secure workmen, and material has to be transported long distances over bad roads.

An effort is being made to simplify the method of handling the less important projects by soliciting informal proposals from builders located reasonably near the proposed work and having the superintendent submit them for approval to the office. In this way it is possible to save often much time and money, and the fact that more work is being done in the open market than usual saves still more time and money.

Contractors complain that it requires too much capital to handle the Indian work on account of the time required in securing payment for work done after the certificate is issued which entitles them to payment. This certificate provides that payment for work done shall be made in installments, the contractor to be paid 80 per cent of the value of the work at the time the certificate is made; the Government retains 20 per cent until the work is entirely completed and accepted. A change should be made in the method of making payments. The money should be available as soon as the certificate is made, as is not the case under the present routine. It is my opinion that the bonded superintendent should be authorized to issue a check for the amount due on all partial payments; the final payment only should be directly authorized by the Indian Office. Contractors of moderate means would thus be in a position to compete for the work of this bureau.

PURCHASE OF SUPPLIES.

As a result of the continued activity on the part of the office and the field in the matter of obtaining quotations in advance of the authorization of purchases of goods and supplies, resulting in the placing before the office of data necessary to an intelligent consideration of the subject, the purchasing end of the service has been more economically administered.

In purchasing goods and supplies for the service the Government land-grant advantages have always been taken into consideration where land-grant deductions were applicable. A large part of the purchasing has been done, as usual, through the medium of the warehouses for Indian supplies at Chicago, New York, St. Louis, Omaha, and San Francisco. In those items where quality is essential to satisfactory service the standard of quality has been raised so far as the funds at our disposal would permit.

Improvements in our specifications, under which merchants and manufacturers bid, have been made from time to time, among them, for instance, being the adoption of the scale of measurements of the Cotton Knit Goods Buyers' Association in order to improve the fit of the underwear bought. This scale is now a part of our specifications for underwear and deliveries must measure up to its requirements.

Preparatory to advertising for the 1913 supplies during the month of April, 1912, descriptive matter in our proposal blanks was thoroughly revised, the revision being based on suggestions from merchants, manufacturers, and others possessing a practical knowledge of our requirements, so that the trade was given a clearer understanding of what was desired, commercial descriptions being used wherever practicable, with the result that increased and more intelli-

gent competition was had. That the Indian business was made more attractive is proved by the increase in the bids received, 775 bids having been received for the fiscal year 1912 and 806 bids received on similar articles for the fiscal year 1913, an increase of 4 per cent.

The plan of shipping supplies to points having competitive transportation facilities over the line offering the best terms has not yet been fully developed, but will probably be consummated next year. The plan to have disbursing officers pay supply claims is partially in effect at the present time, but it has been arranged that claims covering supplies purchased through the warehouses shall be paid through the disbursing officer of the Interior Department after receiving administrative examination in the Indian office, instead of through the Treasury Department, as heretofore, which will, no doubt, result in their payment within 30 days from the date the goods are delivered in the warehouse.

The total value of all supplies purchased for the Indian service during the past fiscal year is approximately $3,875,000.

THE FINANCE DIVISION OF THE OFFICE.

A very large part of the sand in the machinery of Indian administration gets in its work in the finance division of the Indian office. In the first place, the present form of appropriations by the Congress entails an enormous amount of detail work, which is of little or no use in business-like administration; consequently a complete set of books has to be kept for administrative guidance. Many of the forms of doing business compelled by antiquated statutes cause needless delay. The result is that in accounting for every cent, as it should be accounted for, frequently matters are delayed at great human cost. Yet, because certain of the clerical work in this division can be done by less skilled persons than are required in the work of the land or the education divisions, the finance division of the office inevitably has to contain the largest percentage of persons who are really kept in their position as a pension, because of the absence of a civil pension list. A strengthening of the personnel of this division would react more than would at first sight appear throughout the whole service along the lines of prompt response to vital needs.

THE PROPERTY OF THE INDIANS.

The property interests of the Indians constitute one of the greatest estates ever held in trust by any organization, governmental or private. Including the lands, forests, water powers, minerals, and funds held in tribal or individual ownership, the Indians' principal amounts to approximately three-quarters of a billion dollars, and from this property in rentals and interest there comes annually approximately $12,000,000.

USE OF CEDED LANDS.

Under various acts passed by Congress within recent years certain lands ceded by the Indians to the United States are open to settlement and entry, and the Government endeavors to dispose of them at their appraised value for the benefit of the Indians.

Nearly all of such acts contain a clause practically identical with the following:

> That nothing in this act shall in any manner bind the United States to purchase any portion of the lands herein described, * * * or to dispose of said land except as provided herein, or to guarantee to find purchasers for said lands or any portion thereof, it being the intention of this act that the United States shall act as trustee for said Indians to dispose of the said lands, and to expend and pay over the proceeds received from the sale thereof only as received and as herein provided.

It has been the practice to consider such lands under the jurisdiction and supervision of the General Land Office from the passage of the act, and the Indians' title thereto extinguished. On this theory the public at large has come to consider said lands a part of the public domain, and the lands have therefore been used indiscriminately by various interests, principally for grazing purposes, without compensation to the Indians.

By departmental decision of November 27, 1911, it was held in effect that the Indians' title to such lands is not extinguished until date of entry, settlement, or sale, and the Indians are entitled to their use, or to any revenue that may be derived from their use by others, pending date of settlement, sale, or entry.

Following this decision the matter was considered jointly by representatives of this office and the General Land Office, and a set of regulations has been drafted to provide for proper concurrent jurisdiction and the collection, for the benefit of the Indians, of grazing fees from the users of the lands pending actual settlement, entry, or sale.

It is believed that the regulations when put into effect upon the various reservations where applicable will be the means of securing to the Indians large sums of money which heretofore have been lost to them, without interfering with the speedy sale or other disposition of the lands as provided by Congress.

FORESTRY.

During the past year particular attention has been given to construction work on the Indian reservations for the purpose of increasing the efficiency of fire protection and administration of timber matters. The timbered areas on the reservations are being districted as far as practicable for the purpose of patrol and administration and a forest guard assigned to each district and placed in charge,

under the superintendent, of all timber matters in his district. Permanent headquarters are being established in these districts, telephone lines constructed connecting the headquarters with the agency, and roads and trails constructed throughout the timbered areas so as to render fire patrol easier. A number of fire lookout stations have been constructed on the reservations to furnish readier means of detecting forest fires. A large amount of construction work is still needed to properly protect the timberlands from fire.

The record of forest fires is kept by the calendar year instead of by the fiscal year. For the year ending December 30, 1911, no serious fires occurred. So far as reported, the area burned over on the reservations was 3,549 acres, with a total loss of $3,288. The year 1910, however, was a bad fire year, 671,461 acres being burned over on the reservations, with a loss of $675,227. It is important that the office be not lulled into security by the small loss of last year, but that every precaution be taken to protect the reservations in case of the recurrence of another dry season such as 1910.

Technical men have been assigned to a number of the reservations and placed in charge of the timber work thereon. Forest assistants have been placed in charge of the timber work on the Fond du Lac, Klamath, Navajo, Yakima, and Coeur d'Alène Reservations. Forest rangers have been appointed and placed in charge of the timber work on the Jicarilla, Mescalero, and Fort Apache Reservations, and scale inspectors have been placed in charge of such work on the Bad River and Lac du Flambeau Reservations. These men are held responsible to the superintendent for all timber matters on these reservations.

On the Jicarilla Indian Reservation, in New Mexico, the Indians have been encouraged to take hold of the cutting and manufacturing of railroad ties, with great success. The timber on this reservation is all owned by the tribe, although the land has been allotted. Arrangements were made with the Denver & Rio Grande Railroad Co. whereby they offered to take any ties delivered at certain places by the Indians. The area which the Indians are cutting is rough and inaccessible as a logging proposition. The price paid by the railroad company for ties averages a rate of $15.18 per M, board feet. The Indians have been paying into the tribal fund as stumpage an average of $4 per M, and the cost of supervision amounts to 2 cents a tie, or 70 cents per M. The Indians, therefore, receive for their labor about $10.40 per M. By this method all money except the 70 cents per M., which covers the cost of supervision, goes to the Indians either as stumpage or labor. The Indians are cutting many cull ties in order to make good utilization of the material, for which they receive only one-half price. Some of the Indians are making as high as $3.80 a day. This tie cutting is good, healthy work, and very remunerative to the Indians. During the year they cut approxi-

mately 11,000 ties, receiving a total of $4,464, of which $1,237 was paid to the tribal fund as stumpage, the balance going to the Indians cutting the ties after the cost of supervision, amounting to $221, had been deducted. On other reservations also the Indians have been encouraged to cut the timber on their allotments themselves, delivering the logs at specified points as desired by the purchasers.

On the Tongue River Indian Reservation, in Montana, it was discovered that a large amount of timber was being killed by insects. The total stand of timber on the reservation is estimated at about 400,000,000 board feet, of which approximately 5,000,000 feet was infested. An examination of the timber was made by the Bureau of Entomology. They reported that unless steps were taken immediately to control the insect infestation all the timber on the reservation would be killed, but that if approximately 3,000,000 board feet of the infested timber were removed the infestation would be checked and the remaining timber saved. There was, however, a market for only about 500,000 feet of timber a year near the reservation, and it was therefore found to be impossible to utilize all of the timber which it would be necessary to remove. A contractor was found who agreed to take over the agency sawmill and cut and manufacture the timber at $9.50 per M, board feet. There was not sufficient money available to log and manufacture all of the infested timber necessary to be cut, and therefore only about 500,000 feet are being manufactured at the present time. The balance is being cut and barked, and as the timber now being manufactured is sold and the money from the sale of the lumber becomes available the logs now left in the woods will be brought to the mill and manufactured. The brush resulting from the logging is being piled and burned as the cutting progresses.

On the Jicarilla Indian Reservation, in New Mexico, 130,000,000 feet of timber were advertised for sale, the advertisement running 90 days. No bids were received for this timber, but a few days later it was sold at private sale at the minimum rates stated in the notice of sale, $3 per M for the first six years and $3.50 per M for the last three years of a nine-year cutting period. Another sale, amounting to 30,000,000 board feet, was advertised on the same reservation at a minimum price of $3 per M for a six-year cutting period. But one bid was received, at the rate of $3.50 per M. This bid was rejected, owing to the fact that the Indians have become interested in the cutting and manufacture of ties near this area and that the sale already made will furnish sufficient money to take care of the Indians on the reservation as far as the proceeds from the sale of timber can be used for this purpose.

On the Fort Apache Indian Reservation, in Arizona, 300,000,000 feet of timber were offered for sale in conjunction with an offer by

the Forest Service of an equal amount of timber on the adjacent Apache and Sitgreaves National Forests. This timber was advertised for 120 days. But one bid was received, at the minimum rates stated in the notice of sale, $2.50 per M for the first five years and $3 per M for the last five years of a 10-year cutting period. This bid was accepted by the department. The company deposited a check for $5,000 at the time of their bid, but have since failed to execute their contract and bond.

The Indian timberlands, known as the "Forest Reserve," in the Choctaw Nation, Okla., amounting to approximately 1,279,910 acres, were offered for sale during the year under sealed bids. The offer was made in two ways, one for land and timber together, the other for the timber 11 inches and over in diameter without the land, the area being divided into 24 tracts. The sale was widely advertised for 120 days, and a number of bids were received. After the notice of sale had been started it was reported to the office that valuable deposits of manganese had been found on two of the tracts offered for sale. An investigation was made by the Geological Survey. While they reported that the manganese deposits were probably not of commercial value, their presence was deemed sufficient to warrant the rejection of bids on these particular tracts. The prices offered for the other tracts were only slightly in excess of the appraised value, and were made in such a way as to make it seem advisable to reject them all. Accordingly, all bids were rejected for these lands by the department on May 15, 1912.

In addition to these sales which were advertised, offers have been received for certain timber on the Klamath Indian Reservation, amounting to approximately 400,000,000 board feet. A careful examination of this timber was made by the office, and it seems probable that a sale should be made. An offer for timber on the Quinaielt Reservation was rejected by the office after an examination which showed the timber to be worth much more than the price offered. An offer was also received for approximately 40,000,000 board feet of timber on the Nez Percé Reservation. It is believed that by a careful administration of these timberlands, which were reserved for the use of the tribe by the act of August 15, 1894 (28 Stat. L., 327, 330), a steady income of over $10,000 a year can be obtained from the sale of mature timber and the leasing of grazing and agricultural lands. Inquiries have been received regarding timber sales on other reservations, notably the Santa Clara, Yakima, and Mescalero. Increased activity is looked for in the sale of timber next year.

The operations on the Menominee Reservation, in Wisconsin, have been continued with increasing success. Railroad logging, which is now being carried on, insures the mill a steady supply of logs when needed and has reduced the cost of operations. During the

year 25,965,670 feet of timber were logged and 42,956,057 feet of lumber manufactured at the mill; 25,097,331 feet of lumber, 6,840,900 lath, and 2,480,750 shingles were sold, and 1,176,996 feet of lumber were used in construction. At the close of the year there were on hand 42,930,847 feet of lumber in the yards. The total receipts from all products during the year were $509,547.54 and the total disbursements were $411,400.83, showing an excess of receipts over disbursements of $98,346.71, compared to $11,200 last fiscal year. The cost of logging and manufacture compares more than favorably with other mills operating on the same scale in Wisconsin. During the year an average of 219 Menominee Indians were employed at the mills and in the woods, as compared with 205 the preceding year. They earned $71,048.65 in wages.

Logging operations were continued through contractors on the Bad River, Lac du Flambeau and Fond du Lac Indian Reservations, in Wisconsin, and upon the ceded Chippewa pine lands in Minnesota as well as on a smaller scale on other reservations. On the Bad River Reservation 61,897,915 feet of timber were cut, yielding $430,559.16. Upon the ceded Chippewa lands in Minnesota 429,720,339 feet were cut, yielding $2,987,927.37.

By proclamations dated February 17, 1912, the President restored to certain Indian reservations all those portions of said reservations which were placed in national forests by proclamations of March 2, 1909, the restoration to take effect March 1, 1912. The reservations affected are as follows: Fort Apache, Hoopa Valley, Jicarilla, Mescalero, Navajo, San Carlos, Tule River, and Zuni. The area covered is approximately 2,486,000 acres of land. It is estimated that there are 10,826,180,000 board feet of merchantable timber, 2,500,000 cedar posts, and 875,000 cords of firewood on these lands, valued at approximately $18,581,800. The value of the land itself, at a conservative estimate, is $5,000,000. There are approximately 35,000 Indians on the reservations affected by these withdrawals.

IRRIGATION.

The appropriations for irrigation work for the fiscal year 1912 were a little over $1,300,000, of which amount nearly $1,000,000 is reimbursable to the Treasury when the irrigated lands shall have been put in successful cultivation and the Indians have become self-supporting.

Important construction was carried on at Fort Hall, Idaho, where the system has been completed with the exception of a few short and inexpensive laterals. During the year water was furnished to about 8,155 acres, showing an increase of 3,286 acres, of which increase 455 acres are Indian lands.

On Crow Reservation, Mont., construction was continued on the Agency Canal and Little Big Horn No. 2 Canal, including necessary structures. Necessary maintenance and repairs were continued on Big Horn Agency, Lodge Grass, Pryor Creek, and other canals and ditches, which consisted in replacing the old wooden structures with concrete.

At Fort Belknap, Mont., several timber structures were put in during the year and repairs made to others. A new concrete headgate for the Milk River Main Canal was completed during the year.

The construction on the pumping plant to irrigate about 6,000 acres of the best land on the Colorado River Reservation was under way during the entire year. The pumping plant has been completed with the exception of part of the building. About 8 miles of the canal system have been completed.

On the Fort Mojave Reservation two pile jetties were constructed for the protection of valuable agricultural land from the encroachment of the Colorado River. These jetties, while not permanent, diverted the current of the flood sufficiently to prevent further damage.

Work was continued on the extension of the Spring Creek ditch for the irrigation of the Southern Ute allotments, about 8½ miles of ditch and laterals having been completed. The only feasible project for the diminished Southern Ute Reservation has been constructed during this year for a distance of about 3 miles, covering about 600 acres.

No construction work was done on the San Juan project in New Mexico, all efforts being confined to repairing damages caused by excessive floods during the year.

On the Uintah Reservation, Utah, new work has been confined to the construction of such laterals as were required for present use; necessary maintenance and operation has been done, the force having been reduced accordingly.

On the Yakima Reservation, Wash., the drainage work started during the fiscal year 1911 was practically completed during the fiscal year 1912. Machinery was used almost exclusively, moving during the year a total of over a million cubic yards of material at an average cost of 8.34 cents per cubic yard. These ditches have drawn off water from a large area of land which has been producing crops by subirrigation. The irrigation activities have been restricted to operating and maintaining the system, no new work having been undertaken on account of the condition of the water rights. In this connection it should be mentioned that at the close of the year there was developed near the geographical center of the irrigable area a large artesian flow at a depth of 510 feet.

On the Diminished Wind River Reservation, Wyo., construction of laterals and concrete headgates has been carried on. In view of the necessity of making beneficial use of the waters under ditches already constructed, the irrigation force has been reduced to that required for the maintenance and operation of the system.

Work was under way on several of the Mission Reservations in southern California and the pueblos in New Mexico.

During the year investigations by the engineers of this service for power and storage projects were made on practically all the Indian reservations. Most of the reports have been received, and appropriate orders for withdrawals necessary will be submitted in the near future.

MINERALS ON INDIAN RESERVATIONS.

Save important deposits of gold, coal, oil, and gas on the Wind River Reservation in Wyoming, all the lands of Indians containing valuable minerals are located in Oklahoma among the Five Civilized Tribes, Osage, Oto and Missouria, Sac and Fox, and Ponca Indians.

Though the existence of petroleum and natural gas in the Indian Territory (now Oklahoma) was known for many years, but little real development of the region took place prior to 1903.

Among the Five Civilized Tribes one of the greatest oil fields in the world has been developed, largely under departmental leases. The production for a number of years has been approximately 40,000,000 barrels per annum. Since the removal of restrictions on the alienation of lands by the department May 27, 1908, a large percentage of these leases has been made direct by the Indian owners free from departmental control. However, during the past year, approximately 13,000,000 barrels of oil were produced from leases supervised by the department, and the royalties collected on oil and gas during the past year amounted to $851,097—most of which was received from leased lands in the Cherokee and Creek Nation.

On the Osage Reservation oil and gas operations are conducted under the Edwin B. Foster lease of March 16, 1896, which expired by limitation March 16, 1906. Congress, by act of March 3, 1905, extended this lease and a number of subleases thereof for a period of 10 years, and limited the lands embraced therein to 630,000 acres in the aggregate. During the past year 9,446,060.10 barrels of oil were produced, and a royalty of 12½ per cent thereon paid to the Indians amounted during the period mentioned to more than $656,000.

By section 3 of the act of June 28, 1906, authority was granted for the leasing for mineral purposes of that part of the Osage land not covered by approved subleases under the act of March 3, 1905. The regulations governing the leasing of these additional lands (aggre-

gating 800,000 acres) for oil and gas purposes were approved by the department July 3, 1912, and provide for the offering of the lands under sealed bids. The royalty fixed by the President for oil is 16⅔ per cent. As yet no leases have been approved under the new regulations.

Comparison of the productions for the years 1911 and 1912 show that there was very little increase therein, but that a larger amount of money was received during 1912, which was due to an advance in the price of oil.

On the Oto and Missouria, Sac and Fox, and Ponca lands in Oklahoma, about 165 oil leases have been entered into, embracing 41,400 acres, on which royalties amounting to about $11,000 have been paid to the Indians.

On the Wind River Reservation, Wyo., prospecting and development of lands leased for coal, oil, gas, and asphalt have been in progress, but no discoveries of value have been reported during the year. One of the producing coal mines on the reserve temporarily suspended operations in December, 1911, on account of the thin strata of coal encountered. During the years 1907 to 1911, inclusive, there was mined from 640 acres of leased land approximately 318,000 tons of coal, for which the Indians received about $37,000 in royalties. During the past year 17 leases, aggregating 1,111.24 acres, were approved for gold placer mining on the reservation, but as yet no reports have been received as to the value of the minerals, if any, taken therefrom.

Most of the lands containing coal deposits are located in the Choctaw and Chickasaw Nations. The Choctaw-Chickasaw agreement of July 1, 1902 (32 Stat. L., 642), provided that no leases of coal and asphalt lands should be made after its ratification September 25, 1902; and the Congress, by act of April 26, 1906 (34 Stat. L., 137), reserved from sale all such lands, whether leased or unleased, until the expiration of existing leases thereon, or until such time as might be otherwise provided by law. The area of the segregated coal lands in the nations mentioned is 445,000 acres, of which about 100,000 are under leases dated between July 11, 1899, and September 16, 1902, and running for terms of 30 years from their dates. The total estimated value of the surface of the land and coal deposits varies from $19,000,000 to $100,000,000 according to the experts who made the examinations. Twenty-eight thousand eight hundred forty-eight tons of coal were produced from leases in the Choctaw Nation, royalty for which amounted to $2,308. In the Creek Nation about 78,000 tons of coal was mined, on which a royalty of $6,000 was paid.

Valuable limestone deposits were discovered on the Tuscarora Reservation in New York, the value of which was estimated by the Geological Survey at about $630,000. A bill was introduced at the

last session of Congress to authorize the leasing of the land containing the deposits, the price offered being $58,000 for the 250 acres of limestone. An adverse report was made by the department on the bill for the reason that the consideration was not deemed adequate, and an amendment thereto was suggested to authorize the sale or lease of the lands under such regulations as the Secretary of the Interior might prescribe.

Although the Tuscarora Indians own their lands in fee, the Attorney General has decided that they can not lease the same unless authorized so to do by Congress.

ALLOTMENTS.

During the year allotments have been approved to 651 Indians, covering 124,000 acres.

This number of allotments approved during the year is small, due largely to the fact that before recommendations covering approval of lands allotted to Indians can be submitted a report must first be obtained from the Geological Survey to show whether the lands allotted contain any coal or other mineral or whether any power site or reservoir possibilities exist therein. While in a number of cases information already on hand at the Geological Survey enables that bureau to certify as to the character of the land allotted, yet in a large number of cases the Geological Survey advises that field examinations will be necessary before definite information can be furnished as to the mineral or nonmineral character of the lands involved. For instance, on the Fort Peck Reservation the allotment work in the field has been completed, and 1,987 Indians have been allotted something over 700,000 acres. Partial returns from the Geological Survey show coal lands falling within 15 townships of this reservation aggregating 277,923 acres. Eighty-nine townships have been reported, in whole or in part, as noncoal, nonoil, and nonmineral. Ten townships remain yet to be reported on, and as data is not available to show the mineral or nonmineral character of the lands the suspension of the approval of the allotments will be necessary until field examinations have been made by the Geological Survey.

This condition exists also in connection with lands in the Blackfeet Reservation, Mont., within which 2,623 Indians have received allotments in the field aggregating 822,984 acres.

The field work in connection with allotments in severalty has progressed satisfactorily during the fiscal year, and in addition to the completion of allotment work on the Fort Peck and Blackfeet Reservations in Montana, it is expected that the allotment work at Fort Hall, Idaho, Yakima, and possibly the Colville Reservation, Wash., will be completed during the working season of the present calendar year. To May 30, 1912, 1,544 allotments of irrigable lands,

covering 32,000 acres, and 3,303 allotments of grazing lands, covering 210,400 acres, had been made within the Fort Hall Reservation, leaving approximately 231 irrigable allotments and 472 grazing allotments yet to be made. On the Colville Reservation, Wash., 1,266 Indians have been allotted 139,771 acres. While the total area within this reservation is large, approximately 1,297,000 acres, yet a large part of the land is rough, mountainous, and unsuitable for allotment purposes. The field men connected with this work have heretofore advised that when all Indians entitled have been allotted there will remain but little, if any, desirable land for homestead settlement. Of the lands within the Fort Peck Reservation, Mont., at least 1,000,000 acres surplus will be available for disposal under the act of May 30, 1908 (35 Stat. L., 558), and on the Blackfeet Reservation approximately 700,000 acres will be placed on the market in accordance with the act of March 1, 1907 (34 Stat. L., 1035).

That part of the Fort Berthold Reservation lying north and east of the Missouri River in North Dakota has been allotted, and the surplus lands, other than those classified as coal, disposed of under the provisions of the act of June 1, 1910 (36 Stat. L., 455). The Geological Survey has reported 238,082 acres within that part of the reservation lying north and east of the river as valuable for coal, of which 73,000 acres were allotted to Indians under the provisions of the act mentioned and joint resolution No. 23, approved April 3, 1912.

Special allotting agents, William Williams and John F. Armstrong, have been engaged recently in aiding the Navajo Indians in Arizona and New Mexico to procure their applications for allotment on the public domain under the provisions of the fourth section of the general allotment act of February 8, 1887 (24 Stat. L., 388).

During the year allotment work has practically been completed within the Yuma Reservation, Cal., and Rosebud and Standing Rock Reservations, S. Dak. and N. Dak. Within the Pine Ridge Reservation, S. Dak., allotments have heretofore been made to 5,444 Indians, covering 1,778,085 acres. Approximately 2,000 Indians within this reservation remain yet to be allotted, and two years longer, at least, will be required to complete the work.

LEASES OF ALLOTTED LANDS.

(Outside Five Civilized Tribes.)

Leases of allotted lands are authorized by the act of February 28, 1891 (26 Stat. L., 794), and acts amendatory thereof. Under these acts and departmental regulations leases may be made for not exceeding three years for grazing or five years for farming purposes, when improvements are provided for as part of the rental. When the consideration is limited to money alone, the term does not exceed

one and two years, respectively. Business leases may be made for five years. This does not include the lands of the Yakima Reservation, Wash., Wind River, Wyo., or Uintah Reservation, Utah. During the fiscal year ended June 30, 1912, 7,077 leases were approved.

Under the act of May 31, 1900 (31 Stat. L., 221–246), the Indians of Yakima Reservation may lease their allotted lands, when unimproved, for 10 years.

Under the act of April 30, 1908 (35 Stat. L., 97), the lands on the Wind River Reservation susceptible of irrigation may be leased for a term not exceeding 20 years. Under the laws of the State of Wyoming the right to use the waters flowing through this diminished Shoshone Reservation in Wyoming will be adjusted on December 31, 1916. There is an area of probably 45,000 acres of irrigable allotted lands on the reservation which, it is believed, the Indians themselves will be unable profitably to utilize, and to which it will be impossible for them to apply water prior to the date on which the water rights will be adjusted. Plans have been formulated to lease and sell such of the allotments as can not be utilized by the Indians with benefit to themselves.

Under the same act of April 30, 1908 (35 Stat. L., 95) the lands on the Uintah Reservation, Utah, susceptible of irrigation may be leased for a period not exceeding 20 years. Able-bodied male Indians are not permitted to lease unless they are engaged in some self-supporting occupation or are cultivating at least 40 acres of their own allotment. Those, such as minors, women, and old people, who are unable to cultivate any part of their land, either through hired help or male relatives, are permitted to lease.

There are 98,000 acres of agricultural lands under ditch on this reservation belonging to the Indians, only 12,000 of which are under cultivation, either by the Indians or lessees. Plans are being formulated to induce whites to enter into leases for these lands with a view to placing them in cultivation and preserving water rights. The leasing of these surplus lands is important if waste of their resources is to be prevented.

Since the last annual report 45 allottees, who have been represented as being competent to manage their own affairs, have been permitted to make the experiment of leasing their allotments without departmental supervision.

SALE OF INHERITED INDIAN LAND.

Under the act of May 27, 1902 (32 Stat. L., 245–275), as modified by subsequent acts of Congress authorizing the sale of inherited Indian land, 392 tracts, covering 43,652.28 acres, were sold this year for $889,185.02, the average price being $20.30 per acre.

Since May 27, 1902, inherited Indian land has been sold as follows:

Sales of inherited Indian lands.

Year.	Tracts.	Area.	Consideration.	Average price per acre.
1903	.....	44,493.99	$757,173.25	$17.01
1904	1,236	122,222.52	2,057,464.50	16.83
1905	978	90,214.97	1,393,131.52	15.48
1906	643	64,447.67	981,430.87	15.23
1907	820	106,359.25	1,248,793.34	11.74
1908	768	91,302,57	1,302,508.94	14.27
1909	753	102,708.00	1,321,258.72	12.86
1910	873	129,359.61	1,956,315.92	15.12
1911	638	79,665.66	1,503,960.38	18.87
1912	392	43,652.28	889,185.02	20.30

SALE OF ALLOTTED INDIAN LAND.

Under the act of March 1, 1907 (34 Stat. L., 1015–1018), as modified by the act of June 25, 1910 (36 Stat. L., 855), authorizing the sale of land allotted to noncompetent Indians, 324 tracts, covering 34,281.11 acres, were sold during the fiscal year for $567,880.75, the average price per acre being $16.56.

Since March 1, 1907, land allotted to noncompetent Indians has been sold as follows:

Sales of lands allotted to noncompetent Indians.

Year.	Tracts.	Area.	Consideration.	Average price per acre.
1908	92	7,990.88	$159,318.81	$19.99
1909	235	34,060.33	442,762.85	12.09
1910	520	82,655.80	1,245,639.96	15.07
1911	494	56,197.98	978,588.27	17.41
1912	324	34,281.11	567,880.75	16.56

In some cases involving the sale of Indian land it was found upon investigation after the sales papers reached this office that the sale was not for the best interest of the Indian owner. In such cases the sale was disapproved and the superintendent was directed to return the money to the purchaser. The purchaser was therefore deprived of the use of his money for several months. To meet this situation new rules of practice in sales cases have been approved by the department, in that the petition from the Indian owner for the sale of all or a part of his land must be approved by the Secretary of the Interior before the land is advertised for sale. In case the sale covers inherited land, the heirs of the deceased allottee are determined by the Secretary of the Interior before the sale is made. Under this plan when Indian land is offered for sale and the purchaser puts up his money there need be no delay in the approval of the sale, as

the only question that will remain is whether the consideration is adequate. The new regulations went into effect in October, 1911, and up to July 1, 1912, 566 petitions for the sale of land were approved.

FEE PATENTS AND COMPETENCY CERTIFICATES.

During the fiscal year 764 applications for patents in fee were received, of which 344 were approved and 420 denied. The area patented embraces 45,529.49 acres. Of the total number of fee patents issued only 38 were issued to full-bloods, and many of the applications were made by allottees of one-sixteenth and one thirty-second Indian blood. In 90 per cent of the fee patent cases the application covered only a part of the allottee's land.

The total number of fee patents issued under the act of May 8, 1906, as modified by the act of June 25, 1910, are as follows:

Patents issued under act of June 25, 1910.

	Approved.	Denied.	Area patented.
1907	889	.....	92,132.50
1908	1,787	68	153,991.78
1909	1,166	767	133,331.79
1910	955	413	99,339.10
1911	1,026	387	114,547.79
1912	344	420	45,529.49
Total	6,167	2,055	638,870.45

Under the provisions of the act of June 25, 1910, which provides for the issuance of certificates of competency to Indian allottees holding fee patents with restrictions on alienation, 22 certificates were issued during the fiscal year covering an area of 1,687.05 acres.

Twenty-two certificates of competency have been issued to members of the Osage Tribe during the fiscal year. A certificate of competency authorizes the allottee to sell and convey any or all surplus lands deeded to him under the provisions of the act of June 28, 1906 (34 Stat. L., 539). Each Osage allottee has approximately 495 acres of surplus land.

But one certificate of competency has been issued to a Kaw Indian during the fiscal year. The certificate authorizes the allottee to sell and convey all lands deeded him under the provisions of the act of July 1, 1902 (32 Stat. L., 636). The Kaw Indians were allotted approximately 480 acres of land each.

Of the 88 Absentee Wyandotte allotments in Oregon 49 have been covered by certificates of competency issued to the allottees on proof of their ability to manage their own affairs. Of these, 20 were issued during the fiscal year ended June 30, 1912. The allotments are for 80 acres each.

In the issuance of fee patents and certificates of competency to Indian allottees and the sale of Indian land the question considered is, What is for the best interest of the Indian owner?

In 1907 and 1908 the issuance of fee patents to Indian allottees was in the experimental stage, and investigations made show that at least 60 per cent of the Indians who received fee patents sold their lands and soon squandered the proceeds derived from the sale. Of the 2,744 applications for fee patents which were received 2,676 were approved and only 68 denied. During these years the recommendation of this office was based solely upon the report of the Indian superintendent that the applicant was competent to care for his own affairs. No other evidence to show the competency of the applicant was required.

In 1909, and since, a greater degree of competency was required to be shown and the superintendent was directed to report in detail, making answer to specific questions as to the past performances of the Indian applicant, his ability to care for himself and family, and the use he intended to make of the land if given a patent in fee.

In 1909, 1910, 1911, and 1912 about 3,400 applications for fee patents were approved and about 2,000 were denied.

As a result of a more strict policy in determining the competency of the Indian applicants, the percentage of cases in which fee-patent Indians failed to make good has been reduced from 60 per cent to about 30 per cent. In nearly all cases where the issuance of a fee patent is recommended by this office the application covers only a part of the Indian's land, and in 90 per cent of the cases the Indian wishes to sell a part of the land to improve the remainder of his allotment.

Questions which arise as to the issuance of fee patents also arise as to the sale of Indian land. Within the past few years a change in the practice of sales cases was put in operation and the superintendent required to make a detailed statement as to the needs and condition of the Indian, so that the records may clearly show whether it is for the best interest of the Indian owner to sell his or her land. The superintendent is also required to report the use the Indian wishes to make of the proceeds of the sale.

INDIVIDUAL INDIAN MONEYS.

Funds belonging to individual Indians under governmental supervision are derived mostly from the following sources: (1) Sale of allotted and inherited lands. (2) Lease accruals. (3) Sale of timber. (4) Oil and gas royalties. (5) Earnings of outing pupils.

The method of handling individual Indian moneys by depositing them in local banks under a surety bond, subject to the check of the

Indian depositor, when approved by the superintendent in charge of the reservation, has been continued throughout the year.

1. *Minors.*—Every endeavor has been made, where parents may not have had ample wisdom but are doing pretty well and taking good care of their children, to conserve the principal, if this could be done without jeopardizing the health of the children or denying the best possible education, in order that the minors might, on attaining their majority, have funds with which to engage in farming or other profitable enterprise. Thoroughgoing justifications were required before the superintendents received authority from this office to approve checks against a minor's account. The main object borne in mind was to be satisfied that the minor received benefit from an expenditure of his funds. The importance of this point of view was brought to the minds of the superintendents by a circular letter issued on October 23, 1911.

2. *Adult Indians able to do a day's work.*—During the past year the office has made a renewed effort to allow the Indians in this class their funds in sufficient amounts without restriction, where a satisfactory showing of competency was made, in order to give them practical experience. On the Colville Reservation alone, out of disbursements for the fiscal year 1912, amounting to approximately $350,000, over $100,000 in amounts large enough to give them actual experience was authorized to be paid unrestricted. The amount so authorized did not include regular monthly payments. The superintendent reports that of the amount allowed the Indians for their unrestricted use probably 50 per cent was used in the improvement of their lands; 25 per cent was probably used for subsistence, and the remainder was so expended as to yield little or no return.

Funds belonging to able-bodied Indians manifestly incompetent were expended, so far as possible, in making permanent improvements upon their allotments and in the purchase of horses and implements, under the supervision of a local field officer. On the Rosebud Reservation during the past fiscal year, out of an expenditure of individual Indian funds exceeding a half million of dollars, more than $180,000 was authorized for the purchase of horses and the construction of buildings. The amount so authorized does not include such articles as household furniture, harness, and farming implements, digging of wells, etc., which represent a large figure of the disbursements. The superintendent of Omaha and Winnebago Agencies stated in his letter of May 25, 1912, that then there were over a dozen full sets of farm buildings under construction on those reservations; that at least a dozen more would be started shortly thereafter, and that probably 30 Indians had planned to sell land and use the proceeds for the same purpose. The improvements constructed

on the Omaha and Winnebago Reservations were supervised by the superintendent. On June 13, 1912, the superintendent of Yankton Indian School addressed a letter to this office concerning individual Indian money, in which he said:

To show that the office here has done what it could to assist these people in the way of funds, there has been paid out during the four months of my incumbency the following amounts:

For seed wheat, $1,713,13; corn, $561.55; oats, $337.55; potatoes, $764.87; garden seed, $45.50; horses, $6,202.78; wagons, etc., $1,347.43; farming machinery, $1,769.17; making a total of $12,741.96. There has also been paid out to these people during the four months that I have been here the following: For February, $9,890.56; March, $12,020.15; April, $8,980.66; May, $13,032.45; total, $43,923.82. In addition to these amounts there was paid out during this time the sum of $12,000 in interest money, and the competent Indians who draw their lease money outside the office have probably received $10,000 more, making a grand total of money expended on these people that they did not earn of $78,670.78, or about $46 per capita. Thus it will be seen that there has been no lack of money drawn by these people during the past four months, and I doubt very much if any more money could have been spent on them profitably.

3. *Old Indians.*—So far as Indians of this class have had means, their money has been authorized freely for such purposes as would keep them well and happy. The superintendent of Fort Lapwai Indian School on February 14, 1912, reported that there were at that time 1,440 Indians under his jurisdiction who had on deposit to their credit $105,979.48. During the month of January, 1912, 196 of these Indians drew monthly allowances, and 695 of the older people were being permitted to draw their rent money direct when due. During the fiscal year probably $20,000 was paid in the form of monthly allowances to about 200 Indians of the Colville Reservation.

A long and forward step has been taken during the past year in regard to the use of individual Indian money for the promotion of farming operations. In approving each individual sale of allotted or inherited land, the Secretary, in an order over his signature, directed the expenditure of the proceeds in whole or in part. Almost invariably a part of the proceeds were authorized by him for the improvement of the grantor's remaining land. If the vendor was an old Indian and lived in a sanitary house he was in most cases provided with a monthly payment. This method precluded all possibility of the proceeds of sale being diverted to other uses than for the purposes and needs which were advanced as a justification for the sale of the allottee's land.

Efforts to promote honor and integrity during the past year were made by various means in many individual cases, As the keynote of Indian progress has been individualism, perhaps the most effective general action taken during the fiscal year was the sending of a personal letter to each superintendent handling individual Indian

funds in order to impress upon his mind a most important consideration—that the funds of an able-bodied Indian should be handled in such a way as not to weaken his moral stamina as a man.

DEPOSITARIES FOR INDIVIDUAL INDIAN MONEYS.

It has been the custom to place in national banks, regularly designated and bonded for the purpose, individual Indian moneys derived from the sale of inherited lands and timber on allotments of individual Indians, from the leasing of lands, or from other sources. An act of Congress approved June 25, 1908 (36 Stat. L., 855, 856), provided for the selection, as depositaries for this class of funds, of either National or State banks in the discretion of the Secretary of the Interior; but until recently the deposits were confined to national banks because these institutions are under the supervision of the Government. On several occasions, however, the question of using State banks as depositaries was taken under advisement, and early in 1912 a plan for the investigation of such institutions was formulated by the department in connection with deposits of moneys derived from the sale of surplus and unallotted lands and other property belonging to the Five Civilized Tribes under the act of Congress approved March 3, 1911 (36 Stat. L., 1058, 1070), with the result that by June 30, 1912, the applications for deposits of 42 State banks had been approved.

Following the course pursued regarding those tribal funds, steps were taken looking toward the use of State banks as depositaries elsewhere in the service. A plan for investigating the State banking institutions of South Dakota was next developed by the department, and a number of banks have applied for deposits. Plans applicable to banks in other States are being formulated, and in cases where convenience to the Indian depositors, the rates of interest offered, and the investigation of conditions warrant, deposits of Indian funds will be made in State institutions.

One advantage which seems certain to result from this departure from the old practice is that there will become available for selection a larger number of depositaries located in or adjacent to the Indian communities, thus making it easier to inculcate practical and valuable business lessons, and at the same time lifting the Indians, at least from a commercial standpoint, in the estimation of the white citizens; in other words, their condition will more nearly approximate that of their thrifty white neighbors.

Although the office has, as a rule, been able to procure a good rate of interest on these Indian funds, while protecting them against loss by requiring surety bonds from the banks, it is hoped that the acceptance of State banks as depositaries will bring still better earnings.

EMPLOYEES IN THE FIELD.

An important change pertaining to the method of appointing superintendents was effected during the year. Heretofore these officers have been drawn from the lower grades in the Indian service by promotion—in a few instances by transfer from other branches of the service—there being no provision for appointing persons to this position who were not already in the classified service. Superintendents being usually selected from chief clerks, principal teachers, and farmers who by reason of their long experience and fitness for their special lines of work had high efficiency ratings, promotions were practically limited to seniority. The appointment of an employee whose efficiency record showed him to stand high in his special line of work was in the nature of an experiment, as his ability outside of his specialty could not be definitely determined. This was the greatest weakness of the system, and the need of a broader field from which to draw material was apparent. Consequently arrangements were made with the Civil Service Commission for holding an examination or test, with a view of establishing an eligible list of persons from which to make selections. This test was designed to ascertain the business and executive ability of the competitor, as well as his qualifications as a practical sociologist in meeting human problems.

This change in policy has demonstrated conclusively that there are men now in the service who are excellent material for promotion to a superintendency, but whose qualifications for the position probably would never have been brought out under the former system. It has also shown that there are many men outside of the service who could command much larger salaries in the business world than the office can pay under existing appropriations, but who are willing to sacrifice material compensation because of their deep interest in the Indian work.

The test may be taken at any time and place, the papers being rated from time to time, and a new register of eligibles established quarterly. In the effort to procure the very best possible material for appointment as superintendents, the office has had the hearty cooperation of the Civil Service Commission.

Another step affecting the personnel was the matter of placing within the classified service all persons paid from tribal funds. For many years no distinction was made by this office or by the Civil Service Commission between the positions paid from such funds and those paid from congressional appropriations. But a year or so ago the Civil Service Commission issued a ruling that employees paid from tribal funds were not within the classified service. About 1,000, or one-sixth, of the employees were affected by this ruling, and as it

is frequently necessary to change from one fund to another in the payment of salaries, eventually a larger number would have lost their classified status. Therefore, this ruling, if adhered to, would have had a demoralizing effect upon the personnel, as few persons would care to remain in a service where the tenure was so uncertain; nor could competent persons be procured to take their places. Therefore, the commission was requested to reconsider the matter, and, after being placed in possession of all the facts, reversed its former ruling.

The difficulty experienced in the past in procuring and retaining a competent corps of employees has not lessened, and it has been necessary at times to carry a large temporary force. This condition is due to the large percentage of civil-service eligibles who decline appointment and to the comparatively short period those appointed remain in the service. During the fiscal year 1911 but 53 per cent of the eligibles certified by the Civil Service Commission were willing to accept positions, and this percentage dropped to 51 during 1912. Approximately 23 per cent of the present force has been in the service one year or less; 15 per cent, two years; 11 per cent, three years; 10 per cent, four years; and 6 per cent, five years, making about 65 per cent of the field force that has been in the service less than five years.

Aside from the large number of changes occurring by resignation it became necessary to make about 600 transfers within the service in order to give deserving employees slight increases in salary.

OFFICE WORK AND PERSONNEL.

During 1912 the work in the office increased more than 6 per cent over the preceding year, while the force was diminished by three clerks, and present indications give promise of as great an increase in work during the ensuing year with the number of employees remaining stationary. Betterment of office methods can not offset this increase. In fact, the inadequacy of the force on current routine matters often prevents proper thought and attention being given to constructive work.

During the year office force performed nearly 1,800 days' overtime work without recompense, an average of nearly 8 days for each person employed. Most of this was purely voluntary on the part of the clerks.

ORGANIZATION AND METHODS OF WORK.

While some improvements have been effected in the organization of the service and methods of work, these subjects have not had the careful study and attention they deserve. This duty falls upon the Chief of Methods Division, who also has charge of the mechanical

branch of the office work; i. e., mails and files, stenographic, and statistics sections.

It is unfortunate that the inadequate force prevents a person familiar with business methods and organization devoting his entire time to this task of organization and method to the exclusion of all other duties. Large returns would be realized on such an investment.

During the year much attention has been given to organization of the statistical work with very gratifying results. Heretofore statistical information concerning the service has been very incomplete. I was in the position of head of an institution of gigantic proportions and with widely diversified interests without adequate knowledge of what had been and was being accomplished, what yet remained to be done, and the material I had to do with. Without this knowledge administration must necessarily have lacked intelligence to some extent. This condition has been materially improved and will be further remedied during the ensuing year.

RECLASSIFYING AND INDEXING OLD FILES.

In March of this year, through exhaustion of the special appropriation of $5,000, it became necessary to furlough the three historians who were doing valuable work in mending, classifying, and flat filing the old files of the office, which date from its establishment in 1824, and for years have been practically inaccessible. Much remains to be done on these files. They are valuable both for the history they contain and for administrative purposes. At present there is no index of papers previous to 1881, and the filing, which was by subject, has been so frequently rearranged into special files and cases, and Indians have been assigned to so many different superintendencies, agencies, and schools that papers relating to one subject or case are very often found in four or five different places. During the past year calls for these papers have been unusually numerous, resulting in many long and tedious searches. No less obsolete and inconvenient than the old classification and the former practice of folding papers are the unsightly cases in which files are stored.

The files from 1881 to 1907 are fairly well indexed, but they are filed numerically, folded, and stored in old-fashioned cases, which afford them practically no protection.

The files subsequent to 1881 are in by no means as chaotic a condition as those prior thereto, but they should all be properly classified and filed after modern methods, both for present administrative needs and for benefit of posterity. There are not more than a dozen clerks now in the office who are to any extent familiar with the old method of filing or the old agency names, many of which have long

since been changed. These files should be modernized at once while the task is possible through the knowledge of the few clerks who are familiar with them.

The files since 1907 are card indexed and flat filed by subjects under the decimal system and are so arranged that all correspondence in any case may be reviewed with convenience and dispatch. However, the work is not now done entirely satisfactorily, and can not be with the present inadequate force. In the last 10 years this work has increased 170 per cent, while the force has increased but 72 per cent.

INSPECTION.

One hundred and thirty-nine general inspections have been made during the fiscal year, of 127 out of a total of 152 superintendencies, by a working force of 11 supervising officials. The scope of these inspections has been large, embracing, besides a broad general view of conditions, which is their prime purpose, a wide variety of subjects vitally connected with the welfare of the Indians.

A considerable number of special investigations have been made during the year, embracing matters of charges and complaints against superintendents and other employees, alleged frauds perpetrated on Indians, cases of alleged starvation and distress, and other matters of like import. For these duties a force of only four special agents was available at the beginning of the fiscal year, whose aggregate period of service, had they been continually engaged on this class of work throughout the year, would have amounted to approximately 1,200 days. But even with this small force it has been found necessary to place these agents in temporary charge of schools or agencies, or on other assignments outside of their usual duties, for periods aggregating 365 days, or about one-fourth of their time. The need for relief in this direction is apparent. Only by the aid of departmental inspectors has it been possible to keep this branch of the Indian inspection service from failure to fulfill its purposes.

In all, 318 reports have been submitted by supervising and investigating officials during the year. Many reports on general and special matters made by superintendents are not included in this calculation.

All the 152 superintendencies (or jurisdictions) have been visited at least once during the year by a representative of the office, with the exception of 11, five of these being day schools of the second district (California, Nevada, and Arizona), which could not be reached by the supervisor in that district, one-third of whose time was taken by special assignments. This does not mean that the needs of the Indians of these jurisdictions have not been taken care of, for where it has been impossible for a personal visit to be made the office has,

by frequent correspondence, kept in touch with conditions and contingencies as they have arisen; though no correspondence can adequately take the place of the restraining and vitalizing personal touch between the office and its fixed representatives in the field.

A comprehensive glance at the work of the inspecting officials as a body shows that much faithful and painstaking effort has been put forth to "thrash out" and get the right focus on the problems and situations involved in their assignments.

Representatives of the office engaged in the work of general inspections should, however, with greater emphasis than ever, bear in mind the fact that the more the details of inspection work can be disposed of on the ground by a system of cooperation with the superintendents, in the manner hitherto prescribed by the office, the more the field will be cleared for consideration and disposal of the bigger matters revealed by their reports which demand so large a share of the attention of the office.

In conclusion, I can report that the Indian service in all its parts has again shown an increased activity over the preceding year, not in extension of jurisdiction, but in grappling more deeply and more intimately with the problems it has to solve. As I have said before, I believe the increased volume of business is transitory, leading to an early climax and denoting real progress toward the day when the United States will finally have lifted its hands from Indian affairs, and all Indians in all respects will stand on an equal footing with their fellow Americans.

ROBERT G. VALENTINE,
Commissioner.

The SECRETARY OF THE INTERIOR.

STATISTICAL TABLES.

TABLE 1.—*Comparative statement of work and force in Office of Indian Affairs since 1899.*

Year.	Work.		Employees.	
	Letters received.	Increase over preceding year.	Total number employed in Indian Office.	Increase (+) or decrease (−) over preceding year.
		Per cent.		*Per cent.*
1899	61,767	.....	101	.....
1900	63,975	3.57	115	+13.86
1901	75,555	18.10	119	+ 3.48
1902	77,115	2.06	132	+10.92
1903	83,910	8.81	131	− .75
1904	91,125	8.60	127	− 3.05
1905	104,551	14.73	149	+17.32

TABLE 6.—*General data for each Indian reservation, under what agency or school, tribes occupying or belonging to it, area not allotted or specially reserved, and authority for its establishment.*

Name of reservation and tribe.	Area (unallotted).	Date of treaty, law, or other authority establishing reserve.
ARIZONA.		
	Acres.	
Camp McDowell (Under Camp McDowell School.) Tribe: Mojave Apache.	24,971	Executive order, Sept. 15, 1903; act of Apr. 21, 1904, vol. 33, p. 211. (See Ann. Rept. 1905, p. 98.)
Colorado River[1] (Under Colorado River School.) Tribes: Chemehuevi, Kawia, Cocopa,[4] Mojave.	[2] [3] 240,640	Act of Mar. 3, 1865, vol. 13, p. 559; Executive orders, Nov. 22, 1873, Nov. 16, 1874, and May 15, 1876. (See sec. 25, Indian appropriation act, approved Apr. 21, 1904, vol. 33, p. 224.)
Fort Apache (Under Fort Apache School.) Tribes: Chilion, Chiricahua, Coyotero, Mimbreño, and Mogol on Apache.	[2] 1,681,920	Executive orders, Nov. 9, 1871, July 21, 1874, Apr. 27, 1876, Jan. 26 and Mar. 31, 1877; act of Feb. 20, 1893, vol. 27, p. 469; agreement made Feb. 25, 1896, approved by act of June 10, 1896, vol. 29, p. 358. (See act of June 7, 1897, vol. 30, p. 64.)
Fort Mojave (Under Fort Mojave School.) Tribe: Apache.	31,328	Executive orders, Dec. 1, 1910 and Feb. 2, 1911. See 11, act June 25, 1910 (36 Stat., 855–858). Lands now being allotted. See 18579–1910. Area original military reservation, 14,000 acres.
Gila Bend (Under Pima School.) Tribe: Papago.	[3] 10,231	Executive orders, Dec. 12, 1882, and Jan. 17, 1909. (See 4106, 1909.)
Gila River (Under Pima School.) Tribes: Maricopa and Pima.	358,789	Act of Feb. 28, 1859, vol. 11, p. 401; Executive orders, Aug. 31, 1876, Jan. 10, 1879, June 14, 1879, May 5, 1882, and Nov. 15, 1883; Mar. 22, May 8, and July 13, 1911.
Havasupai (Supai) (Under Havasupai School.) Tribe: Havasupai.	[2] 518	Executive orders, June 8 and Nov. 23, 1880, and Mar. 31, 1882.
Hopi (Moqui) (Under Moqui School.) Tribe: Hopi (Moqui) and Navajo.	2,472,320	Executive order, Dec. 16, 1882. Act of Mar. 1, 1907 (34 Stat. L., 1021). See 45096–1910.

[1] Partly in California.
[2] Outboundaries surveyed.
[3] Surveyed.
[4] Not on reservation.

TABLE 6.—*General data for each Indian reservation, under what agency or school, tribes occupying or belonging to it, area not allotted or specially reserved, and authority for its establishment*—Continued.

Name of reservation and tribe.	Area (unallotted).	Date of treaty, law, or other authority establishing reserve.
ARIZONA—continued.		
Navajo[1] (Under Leupp, Navajo, Western Navajo, San Juan Schools, and Pueblo Bonito.) Tribe: Navajo.	11,861,034	Treaty of June 1, 1868, vol. 15, p. 667, and Executive orders, Oct. 29, 1878, Jan. 6, 1880, two of May 17, 1884, and Nov. 19, 1892. 1,769,600 acres in Arizona and 967,680 acres in Utah were added to this reservation by Executive order of May 17, 1884, and 46,080 acres in New Mexico restored to public domain, but again reserved by Executive orders, Apr. 24, 1886, Jan. 8, 1900, and Nov. 14, 1901. Executive orders of Mar. 10, and May 15, 1905, 61,523 acres added to reservation, and by Executive order of Nov. 9, 1907, as amended by Executive order of Jan. 28, 1908, 2,972,160 acres were added. 2,064 Indians have been allotted 328,963 acres under the act of Feb. 8, 1887 (24 Stats., 388), as amended. By Executive orders of Dec. 30, 1908, and Jan. 16, 1911, the surplus lands, approximately 1,641,180 acres, in that part of the extension in New Mexico restored to the public domain (see 35 Stat. L., 457 and 787). (See 1277–9.) Act of May 27, 1902 (32 Stat. 264).
Papago (Under San Xavier School.) Tribe: Papago.	[2] 27,583	Executive order, July 1, 1874, and act of Aug. 5, 1882, vol. 22, p. 291. 41,606 acres allotted to 291 Indians, and 14 acres reserved for school site, the residue, 27,583 acres, unallotted. (See letter book 208, p. 408.)
Salt River (Under Camp McDowell School.) Tribes: Maricopa and Pima.	[3] 46,720	Executive orders, June 14, 1879, and Oct. 20, 1910; Sept. 28 and Oct. 23, 1911. See 26731–1910. (See Senate Doc. 90, 58th Cong., 2d sess.)
San Carlos (Under San Carlos School.) Tribes: Arivaipa, Chilion, Chiricahua, Coyotero, Mimbreño, Mogollon, Mojave, Pinal, San Carlos, Tonto, and Yuma Apache.	[4] 1,834,240	Executive orders, Nov. 9, 1871, Dec. 14, 1872, Aug. 5, 1873, July 21, 1874, Apr. 27, and Oct. 30, 1876, Jan. 26 and Mar. 31, 1877; act of Feb. 20, 1893, vol. 27, p. 469; agreement mad, Feb. 25, 1896, approved by act of June 10, 1896, vol. 29, p. 358. (For fuller text see Misc. Indian Doc., vol. 49, p. 159.) (See act of June 7, 1897, vol. 30, p. 64; act of Mar. 2, 1901, vol. 31, p. 952.) Executive order of Dec. 22, 1902.
Walapai (Under Truxton Cañon School.) Tribe: Walapai.	730,880	Executive orders, Jan. 4, 1883, Dec. 22, 1898, and May 14, 1900.
Total	19,321,174	
CALIFORNIA.		
Digger (Under a farmer.) Tribe: Digger.	370	Act of Mar. 3, 1893 (27 Stats., 612), provides for purchase of 330 acres; not allotted. 40 acres were reserved by order of the Secretary of the Interior, Oct. 28, 1908, for Digger Indians. (See 46597–1907, 71861–1908, 39245–1909.)
Hupa Valley (Under Hupa Valley School.) Tribes: Hunsatung, Hupa, Klamath River, Miskut, Redwood, Saiaz, Sermalton, and Tishtanatan.	[3] [4] 99,051	Act of Apr. 8, 1864, vol. 13, p. 39; Executive orders, June 23, 1876, and Oct. 16, 1891. There have been allotted to 639 Indians 29,143.38 acres, reserved to 3 villages 68.74 acres, and opened to settlement under act of June 17, 1892 (27 Stats., p. 52), 15,096.11 acres of land (formerly Klamath River Reservation). (Letter book 263, p. 96; 382, p. 480; 383, p. 170.)
Mission (28 reserves) (Under Martinez, Pala, Soboba, Pechanga, Malki, Campo, and Volcan Schools. Tribes: Diegueno, Kawia, San Luis Rey, Serranos, and Temecula.]	129,599	Executive orders, Jan. 31, 1870, Dec. 27, 1875, May 15, 1876, May 3, Aug. 25, Sept. 29, 1877, Jan. 17, 1880, Mar. 2, Mar. 9, 1881, June 27, July 24, 1882, Feb. 5, June 19, 1883, Jan. 25, Mar. 22, 1886, Jan. 29, Mar. 14, 1887, and May 6, 1889. 270.24 acres allotted to 17 Indians and for church and cemetery purposes on Sycuan Reserve (letter book 303, p. 297), and 119.99 acres allotted to 15 Indians on Pala Reserve (letter book 303, p. 57), 1,299.47 acres allotted to 85 Temecula Indians, 2.70 acres reserved for school purposes (letter book 351, p. 312). Proclamations of President of Apr. 16, 1901, vol. 32, p. 1970, and May 29, 1902, vol. 32, p. 2005; act of Feb. 11, 1903, vol. 32, p. 822. Warner's ranch of 3,353 acres purchased. (See authority 7971; also letter book 580, p. 113. Deed recorded in misc. record book No. 5, p. 193.) 6,190.41 acres have been purchased under act of June 21, 1906 (34 Stats., 325–333), and act of Mar. 1, 1907 (34 Stats., 1015–1022). Deeds recorded, misc. record book No. 6. Area subject to change by additions under above acts. 123,408.68 acres patented by the Government to various bands under acts of Jan. 12, 1891 (26 Stat. L., 712), and Mar. 1, 1907 (34 Stat. L., 1015–1022). See misc. tract book 36.

[1] Partly in New Mexico. (See Table 7).
[2] Surveyed.
[3] Partly surveyed.
[4] Outboundaries surveyed.

TABLE 6.—*General data for each Indian reservation, under what agency or school, tribes occupying or belonging to it, area not allotted or specially reserved, and authority for its establishment*—Continued.

Name of reservation and tribe.	Area (unallotted).	Date of treaty, law, or other authority establishing reserve.
CALIFORNIA—continued.		
Round Valley (Under Round Valley School.) Tribes: Clear Lake, Concow, Little Lake, Nomelaki, Pit River, Potter Valley, Redwood Wailaki, and Yuki.		Acts of Apr. 8, 1864, vol. 13, p. 39, and Mar. 3, 1873, vol. 17, p. 634; Executive orders, Mar. 30, 1870, Apr. 8, 1873, May 18, 1875, and July 26, 1876; act of Oct. 1, 1890, vol. 26, p. 658. 42,105.56 acres allotted to 1,034 Indians, 1,110 acres reserved for school and agency purposes (72088–1907, letter books 298, p. 17, and 395, p. 260). (See act of Feb. 8, 1905, providing for a reduction of area of reservation, vol. 33, p. 706.) 36,692.23 acres additional allotments made to 619 Indians and 740 acres reserved for school purposes.
Tule River (Under Tule River School.) Tribes: Kawia,[2] Kings River, Moache, Tehon, Tule, and Wichumni.[2]	[1] 48,551	Executive orders, Jan. 9 and Oct. 3, 1873, and Aug. 3, 1878.
Yuma (Under Fort Yuma School.) Tribe: Yuma-Apache.	38,969	Executive order, Jan. 9, 1884; agreement, Dec. 4, 1893, ratified by act of Aug. 15, 1894, vol. 28, p. 332. (See sec. 25, Indian appropriation act, approved Apr. 21, 1904, vol. 33, p. 224.) (See 45893, 52030, 55068–1909.) 7,756.54 acres irrigable land opened under act of June 17, 1902 (32 Stats., 388), act Mar. 3, 1911 (36 Stats., 1063).
Total	316,540	
COLORADO.		
Ute[3] (Under Navajo Springs and Southern Ute Schools.) Tribes: Capote, Moache, and Wiminuche Ute.	483,910	Treaties of Oct. 7, 1863, vol. 13, p. 673, and Mar. 2, 1868, vol. 15, p. 619, act of Apr. 29, 1874, vol. 18, p. 36; Executive orders, Nov. 22, 1875, Aug. 17, 1876, Feb. 7, 1879, and Aug. 4, 1882, and act of Congress approved June 15, 1880, vol. 21, p. 199, and July 28, 1882, vol. 22, p. 178, May 14, 1884, vol. 23, p. 22, Aug. 15, 1894, vol. 28, p. 337, Feb. 20, 1895, vol. 28, p. 677. 72,651 acres allotted to 371 Indians and 360 acres reserved for use of Government (letter book 321, p. 86); also 7,360.32 acres allotted to 39 Indians (letter book 331, p. 395). 523,079 acres opened to settlement by President's proclamation dated Apr. 13, 1899 (31 Stats., 1947). The residue, 483,910 acres, retained as a reservation for the Wiminuche Utes.
Total	483,910	
FLORIDA.		
Seminole	[4] 26,741	Acts Aug. 15, 1894 (28 Stat., 303), Mar. 2, 1895 (28 Stat., 892), June 10, 1896 (29 Stat., 337), June 7, 1897 (30 Stat., 78), Mar. 1, 1899 (30 Stat., 938), June 6, 1900 (31 Stat., 302), Apr. 4, 1910 (36 Stat., 274). 23,061.72 acres purchased for Seminole Indians in Florida under acts mentioned (see Annual Report for 1900, p. 101). 3,680 acres reserved by Executive order of June 28, 1911. (See 20817–1909.)
Total	26,741	
IDAHO.		
Coeur d'Alene (Under Coeur d'Alene School.) Tribes: Coeur d'Alene, Kutenai,[2] Pend d'Oreille,[2] and Spokan.		Executive orders, June 14, 1867, and Nov. 8, 1873; agreements made Mar. 26, 1887, and Sept. 9, 1889, and confirmed in Indian appropriation act approved Mar. 3, 1891, vol. 26, pp. 1026, 1029. Agreement, Feb. 7, 1894, ratified by act of Aug. 15, 1894, vol. 28, p. 322. 638 Indians have been allotted 104,077 acres and 1,906.99 acres have been reserved for agency, school, and church purposes and for mill sites. (See 86950–1908, and acts of June 21, 1906) (34 Stat. L., 325–355), Mar. 3, 1891 (26 Stat. L., 1026–1029), Aug. 15, 1894 (28 Stat. L., 322), Mar. 27, 1908 (35 Stat. L., 56), Apr. 30, 1909 (35 Stat. L., 78). President's proclamation issued May 22, 1909, opening 224,210 acres surplus lands to settlement. (37 L. D., 698.)
Fort Hall (Under Fort Hall School.) Tribes: Bannock and Shoshoni.	[4] 447,940	Treaty of July 3, 1868, vol. 15, p. 673; Executive orders June 14, 1867, and July 30, 1869; agreement with Indians made July 18, 1881, and approved by Congress July 3, 1882, vol. 22, p. 148; acts of Sept. 1, 1888, vol. 25, p. 452, Feb. 23, 1889, vol. 25, p. 687, and Mar. 3, 1891, vol. 26, p. 1011. Agreement made Feb. 5, 1898, ratified by act of June 6, 1900, vol. 31, p. 672, ceding 416,000 acres, of which 6,298.72 acres have been allotted to 79 Indians (see letter book 527, p. 478); remainder of ceded tract opened to settlement June 17, 1902 (President's proclamation of May 7, 1902, vol. 32, p. 1997), act of Mar. 30, 1904, vol. 33, p. 153. Act of Mar. 3, 1911 (36 Stat., 1064). Lands now being allotted.

[1] Outboundaries surveyed.
[2] Not on reservation.
[3] Partly in New Mexico.
[4] Surveyed.

OKLAHOMA—continued.		
Kickapoo (Under Shawnee School.) Tribe: Mexican Kickapoo.	.....	Executive order, Aug. 15, 1883; agreement June 21. 1891; ratified by act of Mar. 3, 1893, vol. 27, p. 557. 22,650 acres allotted to 280 Indians; 479.72 acres reserved for mission, agency, and school purposes; residue opened to settlement by proclamation of the President May 18, 1895, vol. 29, p. 868; act of Mar. 3, 1903, vol. 32, p. 1001. June 21, 1906. (34 Stat., 362.)
Kiowa and Comanche (Under Kiowa School.) Tribes: Apache, Comanche, Delaware, and Kiowa.	.....	Treaty of Oct. 21, 1867, vol. 15, pp. 581 and 589; agreement made Oct. 6, 1892; ratified by act of June 6, 1900, vol. 31, p. 676, ceding 2,488,893 acres, of which 445,000 acres have been allotted to 3,444 Indians; 11,972 acres reserved for agency, school, religious, and other purposes. The residue, 2,033,583 acres opened to settlement (letter books 486, p. 440; 488, p. 478). President's proclamation of July 4, 1901, vol. 32, p. 1975; June 23, 1902, vol. 32, p. 2007; Sept. 4, 1902, vol. 32, p. 2026, and Mar. 29, 1904, vol. 33, p. 2340. Of the 480,000 acres grazing land set apart under act of June 6, 1900, 1,841.92 acres were reserved for town sites under act Mar. 20, 1906 (34 Stat. L., 801), 82,059.52 acres were allotted to 513 Indians under act of June 5, 1906 (34 Stat. L., 213), and 480 acres allotted to 3 Indians under act of June 5, as amended by act Mar. 1, 1907 (34 Stat. L., 1018). The General Land Office reports the sale and entry of approximately 401,465.92 acres under act of June 5, and of 21,251.75 acres under act of June 28, 1906, to June 30, 1911. (See 87404–1909.) (See 75344–1908.) Under act May 29, 1908 (35 Stat., 471), and act June 25, 1910 (36 Stat., 861), 20,498 acres allotted to 169 Indians.
Modoc (Under Seneca School.) Tribe: Modoc.	.....	Agreement with Eastern Shawnees made June 23, 1874 (see Ann. Rept., 1882, p. 271), and confirmed in Indian appropriation act approved Mar. 3, 1875, vol. 18, p. 447. Lands all allotted—3,966 acres allotted to 68 Indians, 8 acres reserved for church and cemetery purposes, 2 acres for school, and 24 acres for timber. (Letter book 220. p. 102.) Act Mar. 3, 1909. (35 Stat., 752.)
Oakland (Under Ponca School.) Tribes: Tonakawa and Lipan.	.....	Act of May 27, 1878, vol. 20, p. 84. (See Ann. Rept. for 1882 p. LXII). (See deed dated June 14, 1883, from Cherokee, vol. 6, Indian Deeds, p. 476.) (See deed from Nez Perce, May 22, 1885, vol. 6, Indian Deeds, p. 504.) 11,456 acres allotted to 73 Indians; 160.50 acres reserved for government and school purposes. The residue, 79,276.60 acres, opened to settlement (letter book 257, p. 240). Agreement made Oct. 21, 1891, ratified by Indian appropriation act approved Mar. 3, 1893, vol. 27, p. 644. (For text, see Ann. Rept., 1893, p. 524.)
Osage (Under Osage School.) Tribes: Great and Little Osage.	.....	Article 16, Cherokee treaty of July 19, 1866, vol. 14, p. 804; order of Secretary of the Interior, Mar. 27, 1871; act of June 5, 1872, vol. 17, p. 228. [See deed dated June 14, 1883, from Cherokee, vol. 6, Indian Deeds, p. 482.) (See act of June 28, 1906 (34 Stats., 539), act of Mar. 3, 1909 (35 Stats., 787), and Public Resolution No. 51, approved Feb. 28, 1909.] 2,230 Indians have been allotted 1,065,134.31 acres (3 selections). Since July 1, 1909, these 2,230 Indians have been allotted 1,465,350 acres from surplus lands, and 5,178.53 acres have been reserved for church, town-site, and railroad purposes. Act Mar. 3, 1909. (35 Stat., 778.)
Otoe (Under Otoe School.) Tribe: Oto and Missouri.	.....	Act of Mar. 3, 1881, vol. 21, p. 381; order of the Secretary of the Interior, June 25, 1881. (See deed dated June 14, 1883, from Cherokee, vol. 6, Indian Deeds, p. 479.) Under acts of Feb. 8, 1887 (24 Stats., 388), Feb. 28, 1891 (26 Stats., 794), and Apr. 21, 1904 (33 Stats., 189), 128,251 acres were allotted to 514 Indians (885 allotments—see L. B. 929, p. 326), 720 acres were reserved for agency, school, church, and cemetery purposes, and 640 acres set aside for tribal uses.
Ottawa (Under Seneca School.) Tribe: Ottawa of Blanchards Fork and Roche de Boeuf.	[1]1,587	Treaty of Feb. 23, 1867, vol. 15, p. 513; 12,995 acres were allotted to 160 Indians; 557.95 acres were authorized to be sold by act of Mar. 3, 1891 (vol. 26, p. 989). The residue, 1,587.25 acres, unallotted. (Letter book 229, p. 115.)
Pawnee (Under Pawnee School.) Tribe: Pawnee.	.....	Act of Apr. 10, 1876, vol. 19, p. 29. (Of this, 230,014 acres are Cherokee and 53,006 acres are Creek lands. See deed dated June 14, 1883, from Cherokee, vol. 6, Indian Deeds, p. 470.) 112,701 acres allotted to 820 Indians; 840 acres were reserved for school, agency, and cemetery purposes; the residue, 169,320 acres, opened to settlement. (Letter books 261, p. 388, and 263, p. 5.) Agreement made Nov. 23, 1892, ratified by act of Mar. 3, 1893, vol. 27, p. 644. (For text see Ann. Rept., 1893, p. 526.)

TABLE 6.—*General data for each Indian reservation, under what agency or school, tribes occupying or belonging to it, area not allotted or specially reserved, and authority for its establishment*—Continued.

Name of reservation and tribe.	Area (unallotted).	Date of treaty, law, or other authority establishing reserve.
OKLAHOMA—continued.		
Peoria..... (Under Seneca School.) Tribes: Kaskaskia, Miami, Peoria, Piankashaw, and Wea.	.....	Treaty of Feb. 23, 1867, vol. 15, p. 513. 43,334 acres allotted to 218 Indians. The residue, 6,313.27 acres, sold under act of May 27, 1902. (32 Stats., 245.)
Ponca..... (Under Ponca School.) Tribe: Ponca.	[1] 320	Acts of Aug. 15, 1876, vol. 19, p. 192; Mar. 3, 1877, vol. 19, p. 287; May 27, 1878, vol. 20, p. 76; and Mar. 3, 1881, vol. 21, p. 422. (See deed dated June 14, 1883, from Cherokee, vol. 6, Indian Deeds, p. 473.) There have been allotted to 782 Indians 100,734 acres, and reserved for agency, school, mission, and cemetery purposes 523.56 acres, leaving unallotted and unreserved 320 acres. (Letter books 302, p. 311, and 813, p. 401.) Indian appropriation act approved Apr. 21, 1904, vol. 33, p. 217.
Potawatomi..... (Under Shawnee School.) Tribes: Absentee Shawnee and Potawatomi.	.....	Treaty of Feb. 27, 1867, vol. 15, p. 531; act of May 23, 1872, vol. 17, p. 159. (222,716 acres are Creek ceded lands; 365,851 acres are Seminole lands.) Agreements with citizen Potawatomi June 25 and Absentee Shawnees June 26, 1890; ratified and confirmed in the Indian appropriation act of Mar. 3, 1891, vol. 26, pp. 1016–1021. 215,679.42 acres allotted to 1,489 Potawatomi, and 70,791.47 acres allotted to 563 Absentee Shawnees, and 510.63 acres reserved for Government purposes; the residue opened to settlement by the President's proclamation of Sept. 18, 1891, vol. 27, p. 989. (See letter book 222, pp. 442, 444, and Ann. Rept. for 1891, p. 677.)
Quapaw..... (Under Seneca School.) Tribe: Quapaw.	.....	Treaties of May 13, 1833, vol. 7, p. 424, and of Feb. 23, 1867, vol. 15, p. 513. (56,245.21 acres allotted to 248 Indians, 400 acres reserved for school and 40 acres for church purposes. (Letter book 335, p. 326.) Agreement of Mar. 23, 1893, ratified in Indian appropriation act approved Mar. 2, 1895, vol. 28, p. 907. Agreement of Jan. 2, 1899, ratified in Indian appropriation act approved Mar. 3, 1901, vol. 31, p. 1067. Act of Mar. 3, 1903, vol. 32, p. 997.
Sauk and Fox..... (Under Sauk and Fox School.) Tribes: Ottawa, Sauk and Fox of the Mississippi.	.....	Treaty of Feb. 18, 1867, vol. 15, p. 495; agreement June 12, 1890; ratified by act of Feb. 13, 1891, vol. 26, p. 749. 87,683.64 acres allotted to 548 Indians, and 800 acres reserved for school and agency purposes; the residue opened to settlement by the President's proclamation Sept. 18, 1891, vol. 27, p. 989. (See letter book 222, p. 169, and Ann. Rept. for 1891, p. 677.)
Seminole..... (Under Union Agency.) Tribe: Seminole.	160	Treaty of Mar. 21, 1866, vol. 14, p. 755. (See Creek agreement, Feb. 14, 1881, Ann. Rept., 1882, p. LIV, and deficiency act of Aug. 5, 1882, vol. 22, p. 265.) Agreement of Mar. 16, 1889. (See Indian appropriation act approved Mar. 2, 1889.) Agreement recorded in treaty book, vol. 3, p. 35. Agreement made Dec. 16, 1897, ratified by act of July 1, 1898, vol. 30, p. 567. Agreement of Oct. 7, 1899, ratified by act of June 2, 1900, vol. 31, p. 250. Approximately 3,122 Indians have been allotted 360,463.74 acres; sold, 3,296.93 acres.
Seneca..... (Under Seneca School.) Tribe: Seneca.	.....	Treaties of Feb. 28, 1831, vol. 7, p. 348; of Dec. 29, 1832, vol. 7, p. 411, and of Feb. 23, 1867, vol. 15, p. 513. 41,813 acres allotted to 435 Indians; 104.22 acres reserved for Government, church, and school purposes. Agreement of Dec. 2, 1901, ratified by act of May 27, 1902, vol. 32, p. 262.
Shawnee..... (Under Seneca School.) Tribes: Seneca and Eastern Shawnee.	.....	Treaties of July 20, 1831, vol. 7, p. 351; of Dec. 29, 1832, vol. 7, p. 411; of Feb. 23, 1867, vol. 15, p. 513, and agreement with Modocs, made June 23, 1874 (see Ann. Rept., 1882, p. 271), confirmed by Congress in Indian appropriation act approved Mar. 3, 1875, vol. 18, p. 447. 12,745 acres, allotted to 117 Indians; 86 acres reserved for agency purposes (letter books 208, p. 266, and 233, p. 207); the residue, 2,543 acres, sold (agreement of Dec. 2, 1901, ratified by act of May 27, 1902, vol. 32, p. 262).
Wichita..... (Under Kiowa Agency.) Tribes: Ioni, Caddo, Comanche, Delaware, Towakoni, Waco, and Wichita.	.....	(See treaty of July 4, 1866, with Delawares, art. 4, vol. 14, p. 794.) Unratified agreement, Oct. 19, 1872. (See Ann. Rept., 1872, p. 101.) Agreement made June 4, 1891, ratified by act of Mar. 2, 1895, vol. 28, p. 895. 152,714 acres allotted to 957 Indians; 4,151 acres reserved for agency, school, religious, and other purposes. The residue, 586,468 acres, opened to settlement (letter book 490, p. 90). President's proclamation of July 4, 1901, vol. 32, p. 1975. Unoccupied Chickasaw and Choctaw leased lands west of the North Fork of the Red River. Act of May 4, 1896, vol. 29, p. 113. President's proclamation, Mar. 16, 1896, vol. 29, p. 878. Act of June 6, 1900 (31 Stat., 680).

[1] Partly surveyed.

TABLE 6.—*General data for each Indian reservation, under what agency or school, tribes occupying or belonging to it, area not allotted or specially reserved, and authority for its establishment*—Continued.

Name of reservation and tribe.	Area (unallotted).	Date of treaty, law, or other authority establishing reserve.
OKLAHOMA—continued.		
Wyandot (Under Seneca School.) Tribe: Wyandot.	[1] 535	Treaty of Feb. 23, 1867, vol. 15, p. 513. 20,942 acres allotted to 244 Indians, 16 acres to churches, etc., leaving 534.72 acres unallotted (letter book 228, p. 332).
Total	2,627,538	
OREGON.		
Grande Ronde (Under Siletz School.) Tribes: Kalapuya, Clackamas, Cow Creek, Lakmiut, Marys River, Molala, Nestucca, Rogue River, Santiam, Shasta, Tumwater, Umpqua, Wapato, and Yamhill.		Treaties of Jan. 22, 1855, vol. 10, p. 1143, and of Dec. 21, 1855, vol. 12, p. 982; Executive order June 30, 1857. 440 acres reserved for Government use and 32,983 acres allotted to 269 Indians. (See letter book 210, p. 328.) Act of Apr. 28, 1904, vol. 33, p. 567, amending and ratifying agreement of June 27, 1901 (33 L. D., 586).
Klamath (Under Klamath School.) Tribes: Klamath, Modoc, Paiute, Pit River, Walpape, and Yahuskin band of Snake (Shoshoni).	[2] 811,802	Treaty of Oct. 14, 1864, vol. 16, p. 707. Act June 10, 1896 (29 Stat.,321). Act of May 27, 1902 (32 Stat., 260). 207,373 acres acres allotted to 1,345 Indians; 6,094.77 acres reserved for agency, school, and church purposes. Indian appropriation act approved Apr. 21, 1904, vol. 33, p. 202; act of Mar. 3, 1905, vol. 33, p. 1033, and act of June 21, 1906 (34 Stat., 367). (See act of Mar. 3, 1909 (35 Stat. L., 752), removal of Modocs in Oklahoma to Klamath and allotments thereto.) Boundary Dispute (see 9881–1911).
Siletz (Under Siletz School.) Tribes: Alsea, Coquille Kusan, Kwatami, Rogue River, Skoton, Shasta, Saiustkea, Siuslaw, Tututni, Umpqua, and thirteen others.	3,200	Unratified treaty, Aug. 11, 1855; Executive orders Nov. 9, 1855, and Dec. 21, 1865, and act of Mar. 3, 1875, vol. 18, p. 446. Agreement Oct. 31, 1892, ratified by act of Aug. 15, 1894, vol. 28, p. 323. 44,459 acres allotted to 551 Indians. Residue, 177,563.66 acres (except 5 sections), ceded to United States. (See letter book 281, p. 358.) President's proclamation, May 16, 1895, vol. 29, p. 866. Acts of May 31, 1900, vol. 31, p. 233, and Mar. 3, 1901, vol. 31, p. 1085. Act of May 13, 1910 (36 Stat., 367).
Umatilla (Under Umatilla School.) Tribes. Cayuse, Umatilla, and Wallawalla.	[1] 74,618	Treaty of June 9, 1855, vol. 12, p. 945, and act of Aug. 5, 1882, vol. 22, p. 297: Mar. 3, 1885, vol. 23, p. 340, and sec. 8 of act of Oct. 17, 1888, vol. 25, p. 559. (See orders Secretary of Interior, Dec. 4, 1888, Ann. Rept., 1891, p. 682.) 82,156 acres allotted to 1,112 Indians, 980 acres reserved for school and mission purposes. (See letter book 255, p. 132.) Act of July 1, 1902, vol. 32, p. 730.
Warm Springs (Under Warm Springs School.) Tribes: Des Chutes, John Day, Paiute, Tenino, Warm Springs, and Wasco.	[1] 322,760	Treaty of June 25, 1855, vol. 12, p. 963. 140,044 acres allotted to 965 Indians, and 1,195 acres reserved for church, school, and agency purposes. The residue, 322,108 acres, unalloted and unreserved (letter book 334, p. 295).
Total	1,212,380	
SOUTH DAKOTA.		
Crow Creek and Old Winnebago. (Under Crow Creek School.) Tribes: Lower Yanktonai, Lower Brulé, Miniconjou, and Two Kettle Sioux.	[1] 111,711	Order of department, July 1, 1863 (see Ann. Rept., 1863, p. 318); treaty of Apr. 29, 1868, vol. 15, p. 635, and Executive order, Feb. 27, 1885 (see President's proclamation of Apr. 17, 1885, annulling Executive order of Feb. 27, 1885: Ann. Rept., 1885, p. LI); act of Mar. 2, 1889, vol. 25, p. 888; President's proclamations, Feb. 10, 1890, vol. 26, p. 1554. There have been allotted to 842 Indians 172,212 acres, and reserved for agency, school, and religious purposes 1,076.90 acres, leaving a residue of 111,711 acres (letter books 302, p. 443; 372, p. 485; 373, p. 347). Lands are now in process of allotment.
Lake Traverse (Under Sisseton School.) Tribes: Sisseton and Wahpeton Sioux.		Treaty of Feb. 19, 1867, vol. 15, p. 505; agreement, Sept. 20, 1872; confirmed in Indian appropriation act approved June 22, 1874, vol. 18, p. 167. (See pp. 328–337, Comp. Indian Laws.) Agreement, Dec. 12, 1889, ratified by act of Mar. 3, 1891, vol. 26, pp. 1035–1038. 308,838 acres allotted to 2,006 Indians, 32,840.25 acres reserved for State school purposes, 1,347.01 acres for church and agency purposes: the residue, 574,678.40 acres, opened to settlement. (See President's proclamation, Apr. 11, 1892, vol. 27, p. 1017.)

SUMMARY.

Birth rate per 1,000 Indian population	[6] 38.40
Death rate per 1,000 Indian population	[6] 32.46
Percentage of the deaths of males due to tuberculosis	30.59
Percentage of the deaths of females due to tuberculosis	33.21
Percentage of all deaths due to tuberculosis	31.96

[1] Not reported.
[2] All live in houses.
[3] Estimated.
[4] Unknown.
[5] Includes 1,368 St. Regis Indians in New York.
[6] Figured on basis of an Indian population of 183,510, upon which Indian superintendents submitted report.

TABLE 20.—*Prevalence of tuberculosis and trachoma among Indians, fiscal year ended June 30, 1912.*

States and superintendencies.	Number Indians examined for disease.	Found afflicted with tuberculosis.		Estimated number having tuberculosis, all forms.		Found afflicted with trachoma.		Estimated to have trachoma.		Treatment of trachoma.	
		Number.	Percentage of those examined affected.	Number.	Percentage of population.	Number.	Percentage.	Number.	Percentage of population.	Cases operated upon.	Cases treated but not operated upon.

[1] Some of the figures in this table as printed prior to 1896 were taken from reports of the superintendent of Indian schools. As revised, they are all taken from the reports of the Commissioner of Indian Affairs. Prior to 1882 the figures include the New York schools.

[2] Indian children in public schools under contract are included in the average attendance, but the schools are not included in the number of schools.

[3] Includes Five Tribes boarding schools.

[4] Decrease.

[1] Act of Mar. 3, 1909 (35 Stat. L., 751).
[2] Act of May 27, 1908 (35 Stat. L., 312); by departmental approval.

Act of Congress dated May 27, 1908 (35 Stat. L., 312), removing restrictions from all lands of intermarried whites, freedmen, and Indians of less than half Indian blood, and from all lands, except homesteads, of Indians having half or more than half and less than three-quarters Indian blood, operated to remove restrictions from the lands of 70,000 Indians, who held 8,000,000 acres.
